Papers of Richard Hill Norris

[1835-1953]

The collection includes papers relating to: Norris' work in physiology including his research relating to blood and physiological physics and his teaching work at Queen's College, Birmingham; his research into photographic plates; his experiments with iron and steel wires; and his interest in spiritualism. This includes notes; articles; drafts and proofs of articles; correspondence; and ephemera and other printed items collected by Norris.

In addition the collection includes business records (including accounts, correspondence and reports) of the Birmingham Dry Collodion Plate and Film Company Ltd and Birmingham Collodion Plate Company which produced Norris' photographic plates; and personal and other general papers such as educational certificates, visiting cards and photographs.

Some papers of Norris' family are also included: papers relating to some of his children (Arthur Kingsley Norris, Benjamin Stuart Norris and Nelly Pratt Norris); papers of his grandson Stuart Wallace Kingsley Norris; papers of Henry James Ley and Richard Ley (the husband and father-in-law of Nelly Pratt Norris); and a diploma of Frederick Walter Norris (relationship unknown).

The majority of items appear to date approximately between the 1860s and 1900s.

Administrative history: Dr Richard Hill Norris (1830-1916) was Professor of Physiology, Queen's College Birmingham, 1862-1891.

Norris' first areas of research as a physiologist appear to have been in the field of physiological physics (the physics of living organisms). One of his first papers was a study of the 'phenomena of attraction and adhesion' in solid bodies, films, vesicles, liquid globules and blood corpuscles which was published in the Proceedings of the Royal Society of London in 1862. His research later concentrated on researching the physics of blood, with a paper entitled "On the Laws and Principles concerned in the Aggregation of Blood-corpuscles..." published in 1869 and a paper 'On the Physical Principles Concerned in the Passage of Blood-Corpuscles Through the Walls of the Vessels' published in 1871.

During the late 1870s and the 1880s, his main work involved a proposed 'third corpuscular element of the

Papers of Richard Hill Norris

blood', a blood corpuscle additional to the red and white blood cells, which was colourless and normally invisible. This third element of the blood was proposed by Norris to explain the origin of the red disc and the formation of fibrin. This theory was published in 1878 in the Proceedings of the Birmingham Philosophical Society. Norris produced various other articles which discussed this theory. A book entitled 'The Physiology and Pathology of the Blood' was published in 1882, which discussed many topics relating to blood including this theory. Norris however had problems in getting his theory of the 'third corpuscle' accepted. His opponents included Professor Huxley whom Norris believed prevented the publication of his theory by the Royal Society, Mrs Ernest Hart who wrote a paper against Norris' theory and George St. Clair who wrote a paper in 1884 arguing there may have been an error in his method of photographing the blood corpuscles. Norris believed that his theories were plagiarized by Bizzozero in an article in the 'Centralblatt' in 1882, and Norris wrote a letter to the Lancet (Volume 119 - 8 April 1882) various articles in which he defended his theory. He received some support in this, including a note by Dr Heslop published in the Proceedings of the Birmingham Philosophical Society arguing that much of Bizzozero's paper echoed Norris' earlier work.

He also researched into other topics relating to blood and claimed to discover a new form of aggregation of blood corpuscles which he called 'the tessellate mode of aggregation'. Other studies of blood by Norris include "On Stasis of the Blood, and Exudation" published in 1862 and "On the extrusion of the morphological elements of the blood" published in 1871. He was a pioneer in the use of micro-photography to record his observations, and many of his works were heavily illustrated with microscopic images of blood.

Norris also carried out experiments he termed 'segment' research involving dissection (mainly of frogs). This included research into 'muscular irritability' (the contraction of muscular tissue under the influence of stimuli) after the death of animals. A paper on the topic of muscular irritability was published in 1867.

As a student, he invented the first dry collodion photographic plate to be produced on a commercial basis in 1856. At the time, wet collodion plates were commonly used, but using wet plates outside was inconvenient. Norris' plates were also the first plates to be produced

Papers of Richard Hill Norris

commercially on a large scale, and before him photographers were required to make their own plates. He founded the Patent Dry Collodion Plate Company in Birmingham and had forty retailers selling his plates by 1858 (Gernsheim 258-259). He later developed a new collodion dry plate which was more sensitive and was patented on 11 May 1888 (patent number 7044). By this time, collodion plates (both wet and dry) had greatly declined in use and it was the dry gelatine plate which was the dominant type of plate. It appears that Norris made a partnership with Harold William Southall of Edgbaston, Birmingham in 1890 to produce the plates and a company (the Birmingham Dry Collodion Plate and Film Company Ltd) was formed soon after. A factory was set up for the company at Yardley in Birmingham, on a site of approximately two acres near the Yardley Arms Hotel off Yardley Fields Road. It appears from Norris' notes that the company was founded in December 1890 and it started production in January 1893. The company however failed for reasons including difficulties in obtaining pure supplies of chemicals, delays in establishing the factory, delays in starting large-scale production and faults with the initial batches of plates (sources include US41/3/1/16 and US41/3/1/21). As a result, the company was in liquidation by 1895 and its works, land, and other property was auctioned on 27 May 1895 (see US41/3/4/1). However, many of the former company's assets were taken over by a new company, the Birmingham Collodion Plate Company, and Norris seems to have been involved in the management of this new company and appears to have been a part-owner of the company, as well as being involved in research and development work. Norris also experimented with microscopic photography, which he used to demonstrate and illustrate his works on blood.

Other research by Norris included research into the molecular changes occurring in iron and steel during heating and cooling, primarily investigating the 'kicks' or 'jerks' in iron and steel wire. This research was carried out following his physiological physics work, and was a follow-up of observations made by George Gore. Norris was also involved with Gore in the Institute of Scientific Research, at 67 Broad Street, Birmingham. This Institute contained laboratory facilities for scientific research used by Gore, Norris and others (Heslop 237; US41/8/4/3).

His main personal interest however appears to have been spiritualism and Norris carried out much work in documenting séances, spirit writing and other events

Papers of Richard Hill Norris

which he thought were caused by spirits. Norris claims in his notes that he could himself communicate with 'spirits' and he carried out 'automatic writing' (writing where the hand was said to be controlled by a 'spirit'). He considered himself to be an 'amateur medium' (for example, see US41/6/8/14 page 110). This interest in spiritualism included 'allopsychism', 'mesmerism' and hypnotism. 'Allopsychism' was defined by Norris as "all operations and modifications that a foreign mind is capable of working on the mind and body of another" (US41/6/11/15). 'Mesmerism' was thought by Norris to be one of these 'allopsychic' powers in which animals (including humans) and spirits could influence the thoughts of another and he thought that spirits could hypnotise people into carrying out certain actions, and he studied cases of people with multiple personalities such as Christine Beauchamp which he thought was caused by a hypnotic influence of spirits.

Norris appears to have been reluctant to be involved in spiritualism in public by publishing his work on the topic, initially it seems because it was considered by him to be "a much tabooed subject" (US41/7/8/27) and later it appears from a draft letter (US41/6/3/40) that it was because he made a decision not to publish anything on spiritualism "till such time as I might have a reasonable grasp of the whole". He did however correspond with various people who also believed in spirits, such as Alfred Russel Wallace and William Crookes, and with spirit 'mediums' such as Emma Hardinge and Samuel Guppy, and he wrote lengthy papers and notes on spiritualism and mesmerism though it appears that these were not published.

Norris was also a member of the Birmingham Philosophical Society, having been the first person to read a paper before the Society and he was the Society's President for the 1883-1884 session. He was also a Fellow of the Royal Society of Edinburgh.

His wife was Anne, born 25 February 1827, married 25 July 1852, died 20 April 1901. Their children were: Richard Hill Norris, born 2 July 1853 died 1919; Mary L. Norris born 13 March 1855; Lillian Norris born 8 March 1857, died 11 March 1858; Nelly Pratt Norris born 2 June 1859 married Henry James Ley 17 February 1886 (source: Lancet 27 February 1886); Arthur Kingsley Norris, born 7 August 1861, died 18 November 1881; Kate K. Norris born 7 June 1863; and Benjamin Stuart Norris (known as Stuart) born 8 May 1866, died 1948.

Papers of Richard Hill Norris

Sources: various items in this collection; various published articles by Norris; Helmut Gernsheim, *The History of Photography* (1955); T.P. Heslop 'The Scientific Position in Birmingham' in 'Proceedings of the Birmingham Philosophical Society' Volume 2 (1880); *The Lancet* 27 February 1886 ('Births, Marriages and Deaths' column); *Birmingham Post* 18 November 1916 (Norris' obituary).

Arrangement: The papers are arranged in nine series according to the topic of the papers (except correspondence, which is kept together as one series). These series are: blood, general physiology and medicine, photography, physiological physics and wire research, segment and spinal cord research, spiritualism, correspondence, general papers, and family papers.

35 standard boxes and one outsized box

Access: Open

Access conditions: Access to parts of this collection is restricted. In accordance with the Data Protection Act 1998 some medical records (US41/9/4/2), which include personal data are closed for the lifetime of the individual where known, or 100 years.

Copyright: Permission to make any published use of any material from the collection must be sought in advance in writing from the Director of Special Collections. Identification of copyright holders of unpublished material is often difficult. Special Collections will assist where possible with identifying copyright owners, but responsibility for ensuring copyright clearance rests with the user of the material.

Language: English

Creator name: Norris, Richard (1830-1916) Physiologist

Custodial history: The Richard Hill Norris papers were donated to the University of Birmingham Library by his grandson, c. 1972-1973.

A paper handlist containing a basic summary of the collection was created in 1973, and the collection was divided into files which were numbered sequentially from 1 to 212 (with sub-numbers for correspondence). The collection was arranged by eight categories: Spiritualism, Blood, General Medicine, Photography, Accounts,

Papers of Richard Hill Norris

Correspondence, Other Scientific Works, and Miscellaneous Papers. Within the categories it appears that mainly there was a random order (except correspondence parts of which were roughly sorted by year then by surname), and related items were often separated from each other. Additionally, many of the individual files appeared to contain papers randomly collected together, with a variety of items not all of which related to each other.

In 2008, a new catalogue with a new structure was completed. The new catalogue included many items from a series of boxes labelled 'Norris Addenda', which were unnumbered and had not previously been catalogued. Another box of uncatalogued items with the label 'Dr Norris Papers Deposited By Ian Hasell 8.1.73' was also catalogued. As part of the new structure, some of the former files were split into separate parts or merged with other files where this appeared necessary in order to keep related papers together, or where it was felt necessary to give part of a file an independent catalogue entry. It did not prove possible to sort out all the former files of loose items entirely due to the randomness of the files and a lack of titles and other evidence of context on many items, so various files of miscellaneous notes are included within most series. In most cases, each file of miscellaneous notes is comprised of the unidentified items from one of the former files.

A record of the old reference numbers with the corresponding new reference numbers has been placed in the deposit file.

Related material: Letter from Thomas Pretious Heslop to Richard Hill Norris (reference LAdd/6113)

Associated material: Norris and Hill Collection (reference D1913) at the William Salt Library (Staffordshire and Stoke-on-Trent Archive Service).

US41/1/1 'The Physiology and Pathology of the Blood' drafts and other items [c 1882]

Drafts of Norris' book 'The Physiology and Pathology of the Blood' including printed proofs and manuscript drafts. Photographs which appear to have been used in the book and a translation of the book into French are also included.

The book was published in 1882 by Smith, Elder and Co. of London. It was Norris' major work on blood covering various areas including how blood develops, Norris' third corpuscle of blood, anaemia and leukaemia. Some parts of the book (including most of Section I and Section II) were based on previous papers (other parts of the book appear to have been newly published).

See also Norris' correspondence (especially 1882 and 1883, US41/7/24-25) which includes many letters relating to this book.

US41/1/1/4 Section I [c 1882]

Manuscript drafts and printed proofs of Section I of the book.

Section I was made up of five parts: Part I 'On the existence in mammalian blood of a previously unknown corpuscle which explains the origin of the red disc and the formation of fibrin'; Part II 'On the origin of the colourless biconcave discs of mammalian blood'; Part III 'On the granule sphere (Kornerkugeln) of Semmer'; Part IV 'On the cause of the biconcave form of the mammalian blood corpuscle'; and Part V 'On the formation of fibrin'. Parts 1 to 3 were based on Norris' earlier paper 'On the

Papers of Richard Hill Norris

existence in Mammalian Blood of a new Morphological Element which explains the origin of the Red Disc, and the formation of Fibrin' (see also US41/1/2/6 for drafts of the original paper).

/1: Manuscript draft of Parts I, II and III.

/2: Galley proof of Parts I and II

Papers of Richard Hill Norris

explanation of the development of the red blood disc and the formation of Fibrin' and 'On some results of certain methods of investigating the blood'

Manuscript drafts and printed proofs of article.

This article was Norris' first paper on the 'invisible corpuscle' or 'colourless disc' in blood. The paper was originally read at the Birmingham Philosophical Society on 14 November 1878 under the title 'On the existence in mammalian blood of an invisible corpuscle which affords an anatomical basis for the explanation of the development of the red blood disc and the formation of Fibrin'. It was published in the 'Proceedings of the Birmingham Philosophical Society' Volume 1 (1876-1879).

Later the article appears to have been revised as a shorter paper entitled 'On some results of certain methods of investigating the blood', and was submitted to the Royal Society in 1879. The paper was again revised as Section I Parts I to III of Norris' book 'The Physiology and Pathology of the Blood' (see US41/1/1/4) which was published in 1882.

/1: Manuscript draft of the 1878 paper.

/2: Manuscript draft of part of the 1878 paper.

/3: Manuscript draft of part two entitled 'On the origin of the colourless biconcave disc of mammalian blood'

/4: Manuscript draft of part of the paper entitled 'The granule sphere (Kornerkugeln)'

/5-6: Galley proofs of 1878 paper.

/7: Galley proof of part two of the 1878 paper.

/8: 'On the existence of an invisible corpuscle in mammalian blood' manuscript draft. Version of the paper which appears to have been intended to be sent to the Royal Society.

/9: 'On some results of certain methods of investigating the blood' manuscript draft.

/10: 'On some results of certain methods of investigating the blood' manuscript article, including photographs of blood. A letter from Walter White of the Royal Society dated 1880 is included, returning the paper.

Papers of Richard Hill Norris

/11-16: Printed fragments of the paper.

1 folder

Access: Open

Custodial history: /1 was formerly part of Norris 162; /2, 3, 4 and 9 were formerly part of Norris 151; /5-6 were formerly part of Norris 129; /7 was formerly part of Norris 132; /8 was formerly part of Norris 146; /10 was formerly unnumbered (found in box labelled 'Norris Addenda'); /11-13 were formerly part of Norris 127; /14-16 were formerly part of Norris 135.

US41/1/2/7 'On the Origin and Mode of Development of the Morphological Elements of Mammalian Blood' 1879

Print of paper by Norris (uncut and unbound copy without cover). The paper was published as a pamphlet in 1879.

1 item

Access: Open

Custodial history: Formerly part of Norris 131.

US41/1/2/8 'Further Researches on the Third Corpuscular Element of Mammalian Blood' [1880]

Draft of article which was submitted to the Birmingham Philosophical Society in 1880 and published in the Proceedings of the Birmingham Philosophical Society Volume 2 (1879-1881) Pages 197 to 222. The article was also published as Section 2 of Norris' book 'The Physiology and Pathology of the Blood'.

/1-2: Drafts (mainly manuscript, partly printed) of article.

/3-4: Printed galley proofs with annotations.

See also US41/1/1/5 for drafts of version published in 'The Physiology and Pathology of the Blood'.

1 folder

Access: Open

Custodial history: /1-2 was formerly part of Norris 155; /3 was formerly part of Norris 137; /4 (first page) was formerly part of Norris 127; /4 (pages 2-4) was formerly part of Norris 137.

Papers of Richard Hill Norris

- US41/1/2/9 'On the Invisible Corpuscles of Mammalian & Oviparous Blood, & their relation to Fibrin formation & coagulation' [c 1882]
- Drafts and printed proof copies of article. The article is written in response to a paper by Legge and a paper by Bizzozero. It was published in 'The Lancet' Volume 120 Issue 3081 (16 September 1882).
- /1: Manuscript draft in Norris' hand with annotations.
- /2: Manuscript copy of paper (not annotated).
- /3-4: Printed galley proofs.
- See also US41/1/3/7, for a copy of the paper by Legge referred to in the article.
- 1 folder
- Access: Open
- Custodial history:** /1 is formerly part of Norris 148, /2 is formerly part of Norris 143; and /3-4 were unnumbered found in box labelled 'Norris Addenda'.
- US41/1/2/10 'On the Development and Coagulation of the Blood' [1883]
- Manuscript drafts and printed proof of article read before the Birmingham Philosophical Society on 12 April 1883 and published in the 'Proceedings of the Birmingham Philosophical Society' Volume 3 (1881-1883). It was also published in 'The Lancet' Volume 122, divided into five parts in issues 3126 to 3130 (1883). The article considers the 'various objections which have been made to [Norris]' views since the publication of... the "Physiology and Pathology of the Blood".
- /1: Manuscript draft of section 'On the action of neutral salts'
- /2: Manuscript draft of section 'On the relation of the colourless disc to free haemoglobin in the liquor sanguinis' (pages 479-497 in the published article)
- /3: Manuscript draft of part of paper (pages 491-494 of published article)
- /4: Manuscript draft of part of paper (pages 499-501 of published article)

Papers of Richard Hill Norris

/5: Manuscript draft of part of paper (pages 503-506 of published article)

/6-7: Printed galley proofs of paper

1 folder

Access: Open

Custodial history: /1-2 were formerly numbered Norris 156B; /3-5 and 7 were formerly unnumbered (found in a box labelled 'Norris Addenda'); /6 was formerly part of Norris 155.

US41/1/2/11 'On a Mode of Demonstrating the Invisible Colourless Disc in the Living Vessels of the Mammal' [1884]

Draft and offprint from the Proceedings of the Birmingham Philosophical Society, Volume 4, Part 1, of article by Norris read before the Society on 8 May 1884. The article explains additional methods of demonstrating the 'colourless disc' in blood.

/1: Manuscript draft of article

/2: Offprint of article.

- US41/2/1/1 Notes on the nervous system and respiration [mid-late 19th century]
- Set of manuscript notes relating to the nervous system and respiration. The notes appear to discuss the topics in a general manner rather than discussing new findings, so seem likely to be notes for lectures to physiology students. Not dated.
- 1 folder
- Access: Open
- Custodial history:** Formerly numbered Norris 176B.
- US41/2/1/2 'Microscopic specimens & subjects for Lectures' notebook [mid-late 19th century]
- Notebook labelled 'Microscopic specimens & subjects for Lectures'; including a list of specimens and a list of subjects for lectures. Not dated.
- 1 notebook
- Access: Open
- Custodial history:** Formerly numbered Norris 165.
- US41/2/1/3 Miscellaneous notes on physiology [mid-late 19th century]
- Notes (probably lecture notes for Norris' classes at Queen's College) including notes on digestion, respiration, and functions of nerve fibres. Not dated.
- 1 folder
- Access: Open
- Custodial history:** Formerly unnumbered, found in box labelled 'Dr Norris Papers Deposited By Ian Hasell 8.1.73'.
- US41/2/2 Lecture notes by students on the nervous system [1871]
- Lecture notes made by students on Norris' course on the nervous system during the 1871 Winter Session at Queen's College, Birmingham. During this session (according to /1), Norris offered the prize of a microscope for the student who produced the best set of notes.
- 3 notebooks, 1 folder

Papers of Richard Hill Norris

- Access: Open
- US41/2/2/1 'Notes on Physiology. Dr. Norris.' 1871
- Notebook containing notes of lectures.
- 1 notebook
- Access: Open
- Custodial history:** Formerly numbered Norris 163.
- US41/2/2/2 'Lectures on Physiology Delivered 1871 January Winter Session by Dr. Norris' 1871
- Notebook containing notes of lectures.
- 1 notebook
- Access: Open
- Custodial history:** Formerly numbered Norris 164.
- US41/2/2/3 'Notes of Lectures on the Nervous System' 1871
- Set of manuscript notes of lectures by Norris.
- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 176A.
- US41/2/2/4 Lecture notes [1871]
- Notebook containing manuscript notes. Not dated, but comparison with other items in this sub-series appears to indicate these are notes of the January to March 1871 lectures.
- 1 notebook
- Access: Open
- Physical description:** Binding is damaged.
- Custodial history:** Formerly numbered Norris 168.
- US41/2/3 Miscellaneous notes [mid 19th century-early 20th century]
- Miscellaneous notes relating to medicine.

Papers of Richard Hill Norris

- 1 folder, 3 notebooks
- Access: Open
- US41/2/3/1 'Book of Queries' [mid 19th century-early 20th century]
- Notebook contained queries and answers relating to physiology.
- 1 notebook
- Access: Open
- Custodial history:** Formerly part of Norris 175.
- US41/2/3/2 Notes and papers mainly relating to diseases, germs and vaccination [mid 19th century-early 20th century]
- Manuscript notes and draft papers mainly relating to diseases, germs and vaccination. Includes article or part of an article headed 'The nature of contagium'
- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 175.
- US41/2/3/3 Notebook [c 1869]
- Notebook containing list of names and addresses; list of names of 'persons to whom copies of my paper on the Rouleaux have been sent'; and notes on Harley's lecture on respiration and other notes.
- 1 notebook
- Access: Open
- Custodial history:** Formerly numbered Norris 166
- US41/2/3/4 85. 'Physiological Scraps' [mid-late 19th century]
- Folder of miscellaneous manuscript notes relating to physiology. Includes notes relating to the cerebellum; draft or copy of letter to the Editor of the Lancet; notes relating to respiration; notes relating to blood; 'Extracts & personal reflections on the muscular sense - Carpenter'; and notes relating to albumins.
- 1 folder

US41/2/5 Medical journals and ephemera [1877-1909]

2 folders

Access: Open

Papers of Richard Hill Norris

- US41/2/5/1 Medical journals and general medical articles 1877-1906
- Various medical journals and an article.
- Comprises:
- /1: British Medical Journal, 23 April 1881
 - /2: 'The Lancet', 1 December 1877
 - /3: 'The Lancet', 31 July 1880
 - /4: 'The Lancet', 22 October 1881
 - /5: 'The Medical News', 28 April 1882
 - /6: 'The Medical News' 19 January 1883. Includes book review of 'The Physiology and Pathology of the Blood' by Norris.
 - /7: 'On Head-Rolling and Other Curious Movements in Children' by George F. Stiller. Article extracted from 'The Clinical Journal' 21 November 1906.
 - /8: 'The Vaccination Inquirer', April 1884
- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 173 and 174.
- US41/2/5/2 Publicity material and miscellaneous printed material [1882-1909]
relating to medicine
- Catalogues, leaflets and other printed material relating to medicine collected by Norris.
- The folder contains the following items:
- /1: Catalogue for 'X-Ray Apparatus' by Muirhead and Co. of Elmers End, Kent; 54 Old Broad Street, London; and 12 Carteret Street, Queen Anne's Gate, Westminster, London. Dated 1899.
 - /2: Leaflet advertising 'Brassoline' liquid polish by Dr Willy Loebell Chemical Works, Muegeln near Dresden, Germany. Not dated;

Papers of Richard Hill Norris

/3: Leaflet advertising 'Bromocarpine, in the treatment [sic.] of diseases of the nervous system', made by Oliviero of Paris-Boulogne;

/4: 'Report on the Hygienic Value of the Solvo Laundry System' by Alfred T. Schofield, 1889.

/5: 'Extract from the New York Medical Record' by the Maltine Manufacturing Co. Ltd to promote Carnrick's Beef Peptonoids and Maltine, including article 'Feeding Per Rectum' by D.W. Bliss from the 'New York Medical Record'. [1882].

/6: 'Annual Report of 'The London and Counties Medical Protection Society, Limited', 1909

1 folder

Access: Open

Custodial history: Formerly part of Norris 173 and 174.

US41/3

Photography company and personal papers

[mid 19th
century-early
20th century]

Manuscript notes and other papers relating to Norris' work in developing photographic plates; records of the Birmingham Dry Collodion Plate and Film Company (Limited) (the company set up to produce Norris' plates) and Birmingham Collodion Plate Company, including account books, notes and receipts.

The majority of items are not dated.

See also US41/7 which includes correspondence regarding Norris' photographic plate businesses.

Arrangement: No distinction is made between the company records and Norris' personal records, as the two were found to be mixed before re-cataloguing had taken place and it proved difficult or impossible to distinguish whether items were company or personal records.

13 folders, 20 vols, 1 draft agreement, 1 draft letters patent, 4 glass plate negatives

Access: Open

US41/3/1

Notes, articles and reports

[mid 19th
century-early
20th century]

Notes relating to Norris' experiments and methods of producing plates. Includes Norris' research notes and items relating to production at the Birmingham Dry

Papers of Richard Hill Norris

Collodion Plate and Film Company, and Birmingham Collodion Plate Company.

See also US41/6/8/11 for notes of experiments between 1894 and 1896; US41/6/1/3 for notes relating to the costs of production.

8 folders, 13 vols

Access: Open

US41/3/1/1 'Emulsion Formulae &c Nov 1907' notebook 1907

Notebook containing manuscript notes on formulae for use in photographic processes and plates.

1 vol

Access: Open

Custodial history: Formerly numbered Norris 184.

US41/3/1/2 'Interim facts' [mid 19th century-early 20th century]
Set of manuscript notes relating to photographic plates.

1 folder

Access: Open

Custodial history: Formerly part of Norris 192.

US41/3/1/3 'Laboratory Book' [1907-1908]

Volume containing notes on photography experiments, including tables recording tests made on batches of plates and table recording details of the collodion made. Volume is labelled 'contains some later researches 1907, 8'. A note on the front says that 'These books contain secret of Collodion Plate'.

The contents of the volume (as listed on 'index' page) are: 'Blistering and slipping of films'; 'Record of batches of plates made of their testing'; 'Trials of batches of plates'; 'Tabular record of the varieties of collodion'; and 'Experiments with gelatine'.

Some loose notes and an unlabelled photograph of an unidentified man are enclosed.

Papers of Richard Hill Norris

1 vol

Access: Open

Custodial history: Formerly unnumbered, found in box labelled 'Norris Addenda'.

US41/3/1/4 'Machines' notebook [c 1893]

Notebook labelled 'Machines' containing manuscript notes relating to producing photographic plates, including on the use of machinery in producing plates and relating to the collodion used.

1 vol

Access: Open

Custodial history: Formerly numbered Norris 182.

US41/3/1/5 'Miscellaneous recipes' notebook [c 1891]

Notebook containing the formula for 'Solution of gelatin for a vehicle or varnish' (for use on photographic plates) and formula for 'Artificial Caoutchouc'.

1 vol

Access: Open

Custodial history: Formerly numbered Norris 183.

US41/3/1/6 'Photographic Formula' [mid 19th century-early 20th century]

Volume containing formulae, notes and articles relating to photographic processes. Includes note at front "was told by my father (in 1916) Dr BS Norris that this book contained the secret of the emulsion for the Collodion Photo". A contents page is included at the front. Various loose notes are enclosed.

1 vol

Access: Open

Physical description: Binding is in poor condition.

Custodial history: Formerly unnumbered, found in box labelled 'Norris Addenda'.

Papers of Richard Hill Norris

- US41/3/1/7 Articles relating to photographic plates [late 19th century-early 20th century]
- Typescript articles on experiments relating to the production of photographic plates. Articles included are: 'Peculiarities of High Temperature Pyroxyline', 'Analysis of High-Temperature Pyroxyline', 'Catechism of the Silver Bath', 'Analysis of High Temperature. Silver bath considerations', and 'Catechism of the Preservative'.
- 1 folder
- Access: Open
- Custodial history:** Formerly numbered Norris 189.
- US41/3/1/8 Notebook mainly relating to photographic plates [mid 19th century-early 20th century]
- Manuscript notes mainly relating to photography including experiment notes, notes on photographic processes and notes on making plates.
- A small number of other notes not connected with photography are also contained in the notebook including: notes headed 'Theological Inquiries' and draft letters to the Dean of the Faculty of St Andrews and Mr Crookes.
- Not dated.
- 1 vol
- Access: Open
- Custodial history:** Formerly numbered Norris 181.
- US41/3/1/9 Notebook relating to photographic plates [c 1895]
- Manuscript notebook containing formulae and other notes relating to photographic plates. Includes the formulae for the products of the Birmingham Collodion Plate Company: lantern slides; the 'Tortoise' and process plate; the 'Eagle' and positive plate; and the 'Gazelle' plate. Other notes include notes entitled 'Pyroxylin formula' and 'Studies in pyroxylin'.
- 1 vol
- Access: Open
- Custodial history:** Formerly numbered Norris 180.

Papers of Richard Hill Norris

- US41/3/1/10 Notebook relating to photographic plates [mid 19th century-early 20th century]
- Notebook labelled 'Midwifery & Vaccinations', but mainly containing formulae relating to photographic plates. Not dated.
- 1 vol
- Access: Open
- Custodial history:** Formerly numbered Norris 167
- US41/3/1/11 Notebook relating to photographic plates [late 19th century-early 20th century]
- Notebook containing manuscript notes relating to photography including notes relating to the manufacture of plates, notes on experiments, and formulae for collodions and other substances used.
- A contents page at the front of the volume lists notes on 'half time process work', 'collodion emulsion', 'collodion for ferrotypes', 'chloride collodions', 'experiments with silver bath' (dated 1898), 'qualitative variation in plates', 'sensitiveness or range', 'chloride of silver printing paper', 'collodion and gelatine developing papers' and 'alcoholic solution of silver nit[rate]'.
- 1 vol
- Access: Open
- Physical description:** Binding is in poor condition.
- Custodial history:** Formerly numbered Norris 177.
- US41/3/1/12 Notebook relating to photographic plates [c 1910]
- Notebook relating to photographic plates and film. Includes notes on 'blue fog facts', 'reexamination of old kept emulsion in Nov 1910' and 'sublayer facts'. Not dated.
- 1 vol
- Access: Open
- Custodial history:** Formerly numbered Norris 178.
- US41/3/1/13 Notebook relating to photographic plates [1890-1893]
- Manuscript notes relating to experiments in producing photographic plates. Includes papers or notes entitled

Papers of Richard Hill Norris

'Researches dating from Sept 15th 1890'; 'Study of the Iodide Plate'; and 'Studies in Emulsion and Orthochromatism May 1891'.

Several loose notes and three unidentified portrait photographs are also enclosed.

1 vol

Access: Open

Physical description: In poor condition. Most of the binding has been destroyed and front cover is missing.

Custodial history: Formerly part of Norris 192.

Custodial history: Formerly numbered Norris 191.

US41/3/1/20 Notes relating to photographic plates [mid-late 19th century]

Set of manuscript notes relating to photography including 'A Chapter on Baths', 'Remarks on Blackening' and notes 'on the condition of sensitive material in the film'. Not dated.

1 folder

Access: Open

Custodial history: Formerly part of Norris 211.

US41/3/1/21 Reports, notes and tables relating to the finances and operation of the company [1890s]

Manuscript reports, notes and tables relating to the finances and operation of the company. Includes estimates on the cost of production and for employing staff; a working plan for the operation of the factory; suggestions for the working of the factory; 'suggestions for carrying on the company on a retail basis only'; analysis of the output of the factory; notes regarding processes; balance sheets; and tables and analyses relating the company's accounts.

1 folder

Access: Open

Custodial history: Formerly part of Norris 193 and part of Norris 192.

US41/3/2 Accounts and receipts 1880-1898

Account books and receipts relating to Norris' photographic plate businesses.

See also US41/6/8/3 for an account book between June 1895 and May 1899; and see US41/6/11/16 for an account book of wages between July 1892 and December 1894 and of petty cash expenses between the (opening of the factory) and May 1896.

5 vols, 1 folder

Access: Open

| | Access: Open | |
| | Custodial history: Formerly part of Norris 193. | |

Papers of Richard Hill Norris

- US41/3/2/5 Book containing receipts, patent renewal certificate and note [1895]
- Receipts for the auction sale following the liquidation of the Birmingham Dry Collodion Plate and Film Company in 1895, certificate for patent renewal and note regarding duty for methylated spirits, pasted in the 1893 Annual Report for Mavisbank Asylum in Edinburgh.
- See also US41/3/4/1 for the 1895 auction catalogue.
- 1 vol
- Access: Open
- Custodial history:** Formerly part of Norris 207.
- US41/3/2/6 Receipts 1880-1898
- Receipts for the Birmingham Collodion Plate Company or for Norris relating to photography. Some receipts addressed to Richard Norris are also included, but these largely seem to relate to photography. Most items date 1895 to 1897.
- See also US41/7 which includes receipts which were enclosed with correspondence.
- 1 folder
- Access: Open
- Custodial history:** Formerly unnumbered, found in box labelled 'Norris Addenda', except three items which were formerly numbered Norris 194/526, Norris 194/543 and Norris 194/547.
- US41/3/3 Legal documents 1857-1890
- Legal documents relating to photography including agreements and a draft patent for Norris' plates.
- 1 folder, 1 draft agreement, 1 draft letters patent
- Access: Open
- US41/3/3/1 Draft agreement for partnership to work a patent 1890
- Draft agreement between Richard Norris and Harold William Southall, of Edgbaston, Birmingham to become partners in a business 'The Collodion Dry Plate Company' for manufacturing Norris' patented photographic plates.

Papers of Richard Hill Norris

Under the agreement, Norris' patent ('Improvements in the production of Collodion Photographic films or surfaces of exalted sensitiveness', patent number 7044, 11 May 1888) was to become the joint property of the two

partners, and Southall was to invest a sum of money to set up the business.

1 draft agreement

Access: Open

Custodial history: Formerly part of Norris 206.

US41/3/3/2 Draft patent for dry collodion photographic process 1857

Draft letters patent for the invention of "Certain Improvements in Photography by the use of Collodion in a Dry Condition, and for a means of Transferring Photographic Films" by Richard Hill Norris.

1 draft letters patent

Access: Open

Custodial history: Formerly unnumbered, found in box labelled 'Norris Addenda'.

US41/3/3/3 Platinotype Company agreement, instructions and leaflet [1880]

Agreement between the Platinotype Company and Richard Norris granting Richard Norris a licence to use the Platinotype photographic process (dated 1880), leaflet regarding Platinotype Process (not dated) and instructions for working the Platinotype Process (dated 1880).

1 folder

Access: Open

Custodial history: Formerly unnumbered, found in box labelled 'Norris Addenda'.

US41/3/4 Miscellaneous [mid 19th century-early 20th century]

Other items relating to Norris' photographic businesses and his plates.

2 vols, 1 folder, 4 glass plate negatives

Papers of Richard Hill Norris

Access: Open

US41/3/4/1 Auction catalogue for sale of Birmingham Dry Collodion Plate and Film Company 1895

Auction catalogue for the sale of the Birmingham Dry Collodion Plate and Film Company (Limited) works at Yardley, plant and stock following the company's liquidation. See US41/3/2/5 for receipts of items purchased by Norris and by Baker and Dugard (presumably for Norris or the successor company) at the auction.

1 vol

Access: Open

Custodial history: Formerly part of Norris 186.

US41/3/4/2 Birmingham Dry Collodion Plate and Film Company and Birmingham Collodion Plate Company publicity and instruction leaflets [late 19th century-early 20th century]

Publicity material to promote the company's products and instruction leaflets for using the company's plates.

1 folder

Access: Open

Custodial history: Formerly part of Norris 186 with some unnumbered items found in box labelled 'Norris Addenda'.

US41/3/4/3 'Correspondents' [late 19th century]

Notebook containing a list of customers (only seven people are included).

1 vol

Access: Open

Custodial history: Formerly part of Norris 207.

US41/3/4/4 Glass plate negatives [mid 19th century-early 20th century]
Glass plate negatives of unidentified landscapes and buildings.

Papers of Richard Hill Norris

4 glass plate negatives

Access: Open

Custodial history: Formerly part of Norris 186.

US41/3/5	<p>Collected printed material</p> <p>Printed material relating to photography collected by Norris but produced by others including leaflets, catalogues and a report.</p> <p>2 folders</p> <p>Access: Open</p>	[1859-early 20th century]
US41/3/5/1	<p>Publicity material</p> <p>Publicity material relating to photography.</p> <p>The folder contains the following items:</p> <p>/1-5: Publicity for Mawson and Swan's Photographic Plates (sold by Arnott, Halliday and Co).</p> <p>/6: 'The New Auto-Carbons' leaflet from The Autotype Company.</p> <p>/7: Catalogue of R and J Beck Ltd of 68 Cornhill, London and Lister Works, Kentish Town, entitled 'Illustrated Catalogue of Photographic Lenses, Cameras & Apparatus manufactured and sold by R. & J. Beck, Limited. (1896) (see US41/7/39/2 for related letter)</p> <p>/8: Leaflet detailing the products of The Britannia Works Co Ltd of Ilford, London.</p> <p>/9: Fuerst Brothers photographic price list.</p> <p>/10: Printed memorandum from Otto Scholzig advertising his photographic papers with enclosed print on "Otto" paper.</p> <p>/11: Leaflet for 'Wellington Plates' by Wellington and Ward, of Elstree, Hertfordshire.</p> <p>/12: Leaflet for Thomas's "Sandell" Plate, by R.W. Thomas and Co Ltd, 10 Pall Mall, London.</p> <p>1 folder</p>	[late 19th century-early 20th century]

Papers of Richard Hill Norris

Access: Open

Custodial history: Formerly numbered Norris 187, except 'The New Auto-Carbons' leaflet which was formerly unnumbered and found in box labelled 'Norris Addenda'.

US41/3/5/2 'Report of the Collodion Committee' and 'Mr Hardwich on Collodion for the Dry Processes' [1859]

Printed proof of a report by the Collodion Committee of the Photographic Society and printed proof of paper by Mr Hardwich read at the Photographic Society.

1 folder

Access: Open

Physical description: In poor condition.

Custodial history: Formerly unnumbered, found in box labelled 'Norris Addenda' (except proof sheet containing pages 7-10 of Hardwich article which was part of Norris 189).

US41/4 Physiological physics and wire research papers [mid-late 19th century]

Manuscript drafts of articles or essays and notes relating to physiological physics and wire research. Papers relating principally to the physiological physics of blood are not included - these are contained in the 'Blood research papers' series (US41/1).

Norris' initial research into physiological physics involved a study of attraction and adhesion. A paper on this topic was published in the 'Proceedings of the Royal Society of London' Volume 12 (1862-1863) entitled 'On the Causes of various Phenomena of Attraction and Adhesion, as exhibited in Solid Bodies, Films, Vesicles, Liquid Globules, and Blood-Corpuscles'. A further paper was published in 1876 in the 'Proceedings of the Birmingham Philosophical Society' entitled 'New Researches in Contractility and Elasticity' (this was in fact the first paper to be published in that journal).

Norris' research into wires involved studying the expansion and contraction of iron and steel wires when they were heated or cooled. He examined the temporary and permanent changes to wires including what he called the heating or cooling 'kicks' or 'jerks' (a temporary expansion during cooling and temporary contraction

Papers of Richard Hill Norris

during heating) and looked at the circumstances in which these changes occurred. His conclusions included that crystallization and decrystallization was the cause of the 'kicks'. A paper on this topic was read at the Royal Society of London on 12 April 1877, and an abstract was published in the 'Proceedings of the Royal Society of London' Volume 26. Drafts of a much more substantial paper or papers on the topic are contained within this series.

15 folders, 3 items

Papers of Richard Hill Norris

- US41/4/1/3 'On the diverse thermal effects which take place in different substances when apparently treated in the same manner' [mid-late 19th century]
- Manuscript essay and notes relating to the effects such as stretching and extrusion caused by heating and cooling on substances such as steel wire and caoutchouc.
- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 196.
- US41/4/1/4 'On The Influence of Momentum in displacing the true Positions of the Kicks' [mid-late 19th century]
- Manuscript article originally contained in folder labelled, 'Manuscript withdrawn from wire researches as Doubtful or Untrue'.
- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 200
- US41/4/1/5 Paper on elasticity [mid-late 19th century]
- Unidentified paper by Norris relating to elasticity.
- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 139.
- US41/4/1/6 Paper on the molecular constitution and behaviour of elastic and contractile substances [mid-late 19th century]
- Unidentified paper by Norris (found in folder labelled 'Part I').
- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 146.
- US41/4/1/7 Paper on wire research [c 1874]

Papers of Richard Hill Norris

Manuscript draft of paper (or part of a paper, or multiple papers) relating to wire research. Includes section or article headed 'On the relation of annealing and hardening'.

1 folder

Access: Open

Physical description: The article is formed from a number of separate pieces of paper pasted on newsprint.

Custodial history: Formerly numbered Norris 198

US41/4/1/8

Paper on wire research

[mid-late 19th century]

Manuscript draft of paper or part of a paper on wire research. Includes a chapter or section entitled 'General considerations as to the influence of the state of the wire exerts upon the position of the Heating Kicks'.

1 folder

Access: Open

Physical description: In poor condition. The paper is formed from various small pieces of paper pasted onto larger pieces of paper, folded like a book.

Custodial history: Formerly numbered Norris 204

US41/4/1/9

Paper on wire research

[c 1874]

Manuscript paper or part of a paper on the effects of heating and cooling on iron and steel wire. Includes sections headed 'Headings for Studies'; 'Experiments'; 'Analysis of the Cast Iron Diagram (Stubbs)'; 'Nickel plated wire'; 'On the real dynamical expansion of iron and steel wires'; and 'Conditions which yield free carbon'.

1 folder

Access: Open

Physical description: The article is formed from a number of separate pieces of paper pasted on newsprint. Some pages are stuck together.

Custodial history: Formerly numbered Norris 199

Papers of Richard Hill Norris

- US41/4/1/10 Paper on wire research [c 1874]
- Manuscript draft paper (or part of a paper) relating to the changes resulting from the heating and cooling of iron and steel wires.
- 1 folder
- Access: Open
- Physical description:** The article is formed from a number of separate pieces of paper pasted on newsprint. Some pages are stuck together.
- Custodial history:** Formerly part of Norris 200
- US41/4/1/11 Paper on wire research [c 1874]
- Manuscript draft of paper or part of a paper relating to the effects of heating and cooling on wire. Includes a section headed 'On the influence of momentum in displacing the true position of the kicks'.
- 1 folder
- Access: Open
- Custodial history:** Formerly numbered Norris 201
- US41/4/1/12 Paper on wire research [mid-late 19th century]
- Manuscript draft of paper or part of a paper relating to the effects of heating and cooling on iron and steel wire. Includes sections headed 'On Permanent Expansion and Kicks'; 'On the causes of the kicks'; 'On the chemistry and microscopy of iron and steel'; 'Tests for manganese'; 'Colours of manganese salts'; 'Carbon: C=12'; 'An examination of the deposits reveals certain peculiarities'; 'Matters to be done'; and 'On the relation which subsists between the first and second kicks'.
- 1 folder
- Access: Open
- Custodial history:** Formerly numbered Norris 202
- US41/4/2 Notes [mid-late 19th century]
- 3 folders

Papers of Richard Hill Norris

Access: Open

US41/4/2/1 Wire research notes 1, 2, 3, 6, 7, 8, 10 and 11 [c 1875]

Numbered sets of manuscript notes relating to the effects of heating and cooling on iron and steel wire. Includes notes of experiments, questions, and draft paragraphs (possibly for use in articles).

1 folder

Access: Open

Physical description: The notes are pasted on newsprint or other paper.

Custodial history: Formerly numbered Norris 197 (notes 1-3), 203 (part of) (notes 6-8) and 202 (part of) (notes 11).

US41/4/2/2 Notes on wire research, contractility, elasticity and cohesion [mid-late 19th century]

Manuscript notes including notes of experiments, notes for articles, diagrams and graphs. Includes experiments using iron and steel wires, India rubber and soap solution.

1 folder

Access: Open

Custodial history: Formerly part of Norris 208.

US41/4/2/3 Notes on wire research and physiological physics [mid-late 19th century]

Manuscript notes. Four plates from an unidentified paper on cohesion are also included.

1 folder

Access: Open

Custodial history: Formerly part of Norris 196, 205, 206 and unnumbered items found in box labelled 'Norris Addenda'.

US41/4/3 Diagrams of experiments and apparatus [mid-late 19th century]

Includes diagrams which appear to show experiments with wires and soap bubbles, and experiments relating to elasticity and contractility. Not dated.

Papers of Richard Hill Norris

- 1 folder
- Access: Open
- Custodial history:** Formerly part of Norris 210.
- US41/4/4 Papers by other authors [mid-late 19th century]
- 3 items
- Access: Open
- US41/4/4/1 'On the hardening, tempering, and annealing of steel' 1879
- Report (printed) by the Sub-Committee of the Institution of Mechanical Engineers to the Research Committee. The report includes references to Norris' work on the expansion and contraction of steel and iron wire.
- 1 item
- Access: Open
- Custodial history:** Formerly part of Norris 205.
- US41/4/4/2 'On the Thermo-electricity of Ferruginous Metals; and on the Thermal Effects of stretching Solid Bodies by J.P. Joule F.R.S.' [mid-late 19th century]
- Manuscript notes relating to article.
- 1 item
- Access: Open
- Custodial history:** Formerly part of Norris 205.
- US41/4/4/3 'Second Step in Chemistry' by Galloway, pages 11 and 12 [mid-late 19th century]
- Manuscript copy of pages 11 and 12 (section referring to elasticity of matter) from Galloway's book or article.
- 1 item
- Access: Open
- Custodial history:** Formerly part of Norris 196.
- US41/5 Segment and spinal cord research papers [mid-late 19th century]
- Draft articles and notes relating to experiments which Norris described as 'segment' experiments and

Papers of Richard Hill Norris

experiments on spinal cord. These experiments primarily involved the decapitation of frogs and other animals to analyse 'muscular irritability' (movement of the muscles). Notes on 'anaesthesia' experiments are also included, in

which movement and other effects on animals to which poisonous gas had been applied were analysed.

Norris published an article relating to this work entitled 'Researches on muscular irritability and the relations which exist between muscle, nerve and blood' published in the *Journal of Anatomy and Physiology*, Volume 1 Number 2 (1867) pages 217-236. Norris' paper 'On Stasis of the Blood, and Exudation' published in the 'Proceedings of the Royal Society of London' Volume 12 (1862-1863) also relates to his segment experiments.

1 folder, 3 vols

Access: Open

US41/5/1

Volume 'X' 'Functions of spinal cord'

[mid-late 19th century]

Volume containing manuscript paper on the functions of spinal cord, also relating to segment experiments. Some loose notes are also enclosed. Not dated.

1 volume

Access: Open

Physical description: Binding is in poor condition.

Custodial history: Formerly numbered Norris 169.

US41/5/2

Volume 'Y' 'Experiments on Segments and on resuscitation'

[1870-1873]

Volume of manuscript notes on segment and 'anaesthesia' experiments with animals. Some loose notes are inserted.

1 volume

Access: Open

Physical description: Binding is in very poor condition.

Custodial history: Formerly numbered Norris 170.

US41/5/3

Volume 'Z' 'Apparatus Connected with Experiments on

[1897]

Papers of Richard Hill Norris

Segments &c'

Volume containing manuscript notes relating to apparatus for experiments; and notes on segment experiments entitled 'New Series of Experiments April 1897'.

1 volume

Access: Open

Physical description: Binding is in poor condition.

Custodial history: Formerly numbered Norris 171.

US41/6/6 'An Inquiry Into The Laws Which Govern Spirit Intercourse with Man' [late 19th century-early 20th century]

Series of typescript and manuscript volumes examining spiritualist topics. The volumes contain a note that they were forwarded to the Psychical Research Society by John Hall-Edwards at the instigation of Sir Oliver Lodge in 1925. According to the note in the volumes, there should be seven volumes, but only six volumes have been found. No evidence was found to suggest these volumes were published.

See also US41/6/3/9.

6 vols

Access: Open

US41/6/6/1 Book 'j'; 'An inquiry into The Laws which govern Spirit intercourse with Man' [Late 19th century-early 20th century]

One of seven volumes of the series 'An inquiry into The Laws which govern Spirit intercourse with Man'. This volume was originally 'Book J' (part of the 'English letter series' of books) containing paragraphs numbered 2441 to 2589.

The contents page lists the following sections in the volume: 'The genesis or initiative of Spirit intercourse with man'; 'Intercourse of spirits with each other'; 'Relation of spirits to Allopsychism and Telepathy'; 'Reciprocal telepathy and allopsychism'; 'Moseley incident'; 'Case of John Lacy'; 'Jane Keyes'; 'Dr Dexter'; 'Conscious

Papers of Richard Hill Norris

telepathy'; 'Preconscious telepathy'; 'Spirit telepathy'; 'Experimental spirit telepathy'; 'Spontaneous spirit telepathy'; 'Simple spirit telepathy'; 'Rev P H Newnham and Wife'; 'Home and Uncle Tilden'; 'Home and Mrs Elmer'; 'Case of the Rev C C Wanbey'; 'Post conscious or memory telepathy'; 'Personal rapports'; 'Mediumship of Mrs Piper'; 'Consciousness'; 'General propositions'; 'Rapports'; 'Mrs H S Thompson and Miss Crowther'; 'Mr Joseph Norris and Dr Norris'; 'Mr Dugard and Dr Norris'; 'Mesmerist and N Dunscombe J P'; 'Mr and Rev Stainton Moses'; 'Mr G A Smith and Mrs W'; 'Marcella and others and Alex Didia'; 'Colonel Llewellyn and the Didier control'; 'Mr H S B and L S V and L C V'; 'Dr Costello and the Dideir control'; 'The Beasley incident'; 'Mr H S Thompson and Mrs Thornton'; 'Esdailes Blind Subject'; 'Mr H S Thompson and two friends'; 'Dr Norris and Robert May'; 'Rev Lawson Sisson and Miss Cook'; 'Miss Alice Baker and Dr Norris'; 'Mr S H B and Miss Verity'; 'Examples of delayed or arrested telepathy'; 'Mr S H B and Mrs L'; 'General remarks'; 'Foxwill Case'; 'Mr Glover and Dr Norris'; and 'Merging of dreams'.

US41/6/1/1 contains a subject index of this volume (listed as Book J).

- US41/6/7 'English letter series' of books [mid 19th century-early 20th century]
- Series of volumes labelled A to W (described by Norris as the 'English letter series'), containing notes relating to spiritualism and mesmerism. The 'books' appear to be unpublished. Additional typed copies of the books or parts of the books and a 'Complemental' book to Book S are also included in this series. Books labelled X, Y and Z by Norris are not included in this sub-series because they do not relate to spiritualism.
- Books A to J and M are described in US41/6/1/1 as 'written notes made at the time thought of during several years'; N and O as 'confined to hypnotism'; P as 'an analysis of Mrs Piper'; Q as 'a diagrammatic book of rapports'; R as 'on insanity'; S as 'prop: auto, allopsychic and peripheral'; T as 'life and consciousness'; U as 'religious mediumship'; V as 'series of early reflections'; W as 'materialization'; X, Y and Z as 'physiological (segments etc)'.
US41/6/1/2-3 contain brief summaries of the contents of these volumes, and US41/6/1/1 provides an index of most of these volumes.
See also US41/6/2 and US41/6/4/9 which includes lists of paragraphs contained in the 'English letter series' on particular topics. For book J see US41/6/6/1, and for books X to Z (which do not relate to spiritualism) see US41/5/1-3. See US41/6/9 for some of the original notes used in creating some of the 'English letter series' of books.

US41/7

Personal and business correspondence

[mid 19th
century-early
20th century]

Correspondence received by Norris, the Birmingham Dry Collodion Plate and Film Company and the Birmingham Collodion Plate Company, and copies or drafts of letters written by Norris. Items enclosed with correspondence such as receipts, visiting cards and leaflets are also included.

The correspondence relates to a variety of topics and includes letters from many important figures in physiology and medicine, plus letters from local doctors and scientists in the Birmingham area. In particular there are many letters thanking Norris for sending copies of books or papers (some with comments on the book or paper), several letters relating to Norris' theories on blood including letters from supporters and opponents and letters relating to Norris publishing papers or delivering lectures and demonstrations. There are also various letters relating to his photographic plate businesses between 1890 and 1909 such as letters from suppliers and letters from photographers who have used Norris' plates. Much correspondence relating to spiritualism is included, with letters from mediums such as Emma Hardinge Britten and Samuel Guppy, and letters from people who believed in spiritualism including a large number of letters from Alfred Russel Wallace.

See also US41/9 for letters received by Norris' family.

Arrangement: The letters are arranged firstly by year, then by surname or company name of the sender (for letters to Norris) or the surname or company name of the recipient (for letters from Norris).

767 letters, 1 leaflet, 5 receipts, 3 visiting cards, 1 business card, 2 account sheets, 1 credit note, 1 price list, 2 lists of questions

Papers of Richard Hill Norris

Access: Open

Notes: Additional information about some of the correspondents (including full name, occupation, date of birth and death) has been mainly sourced from the online version of the Oxford Dictionary of National Biography (www.oxforddnb.com), accessed various dates in 2008.

US41/7/1 1856 correspondence 1856

Letters from J.G.H. Brown, of Walker Street, Sneinton, Nottingham. Relating to spiritualism.

US41/7/6 1864 correspondence 1864

Letter from Norris to the Committee of the Small Arms Provident Sick Society applying for the office of Surgeon.

1 letter

Access: Open

Custodial history: Formerly numbered Norris 194/14.

US41/7/7 1865 correspondence 1865

Correspondence dated or appearing to date to 1865.

Letters from the following correspondents are included:

/1: (unknown), of 23 Parsonage Street, Oldfield Road, Salford, Manchester. Relates to the Victoria Society [Victoria Institute] (also known as the Philosophical Society of Great Britain), a speech made by Lord Shaftesbury at the first dinner of the Institute and other matters. Part of the letter appears to be missing. [circa 1865].

/2-3: J. Lockhart Clarke [Jacob Augustus Lockhart Clarke (1817-1880), anatomist], of 60 Warwick Street, Belgravia. Letters are marked '1865?' in pencil.

/4: Letter in Norris' hand to Mrs Norton, addressed to 22 Northampton Street, Nottingham, regarding miners lamp brackets. An envelope found with the letter appears to indicate the address was invalid and it appears it was returned to Norris.

/5: James Russell. Letter relating to a question by Norris regarding a disease.

/6: J. Murray Spear, at Hotel de la Flavione, Paris. Relates to spiritualism.

/7: William Turner [Sir William Turner (1832-1916), anatomist and university administrator], Honorary Secretary. Relating to a grant for Norris' research on rigor

Papers of Richard Hill Norris

mortis. Found in envelope labelled 'Sir Wm Turner British Ass. Grant 1865'. [1865].

5 letters

Access: Open

Custodial history: /1 was formerly numbered Norris 194/557; /2-4 were formerly numbered Norris 194/15-17; /5 was formerly numbered Norris 194/459; /6 was formerly numbered Norris 194/18; /7 was formerly numbered Norris 194/250.

US41/7/8 1866 correspondence [1866]

Correspondence dated or appearing to date to 1866. Most of the correspondence relates to spiritualism.

Letters from the following correspondents are included:

/1: (Draft or copy?) of letter from Norris to unidentified person. Relates to spiritualism, including a reference to communicating with Norris' brother, and asking whether the recipient can persuade Miss Hardinge to give him advice and assistance. Some notes relating to a proposal for the establishment of a spiritualist society are also included. [circa 1866].

/2: Notes or copy of letter in Norris' hand. [circa 1866].

/3-4: Mrs Ackworth, of Elfinward, Hayward's Heath, Cuckfield, with draft or copy of letter from Norris. Letter forwarded to Norris by Emma Hardinge (see /32). Relating to spiritualism and Norris' illness.

/5: R. Lewis (on behalf of Mrs Ackworth), of Elfinward, Hayward's Heath, Cuckfield. Informs Norris that Mrs Ackworth is unable to answer Norris' letter at present due to her illness. [1866].

/6-11: Benjamin Coleman, of 51 Pembridge Villas, Bayswater, London, with drafts or copies of replies from Norris. Relating to spiritualism and Miss Hardinge (a famous medium, and spiritualist), and the death of Norris' brother. See also US41/6/10/3.

/12-25: Correspondence and notes relating to spiritualism, which appear to have been sent by Josiah Glover (a medium), of 14 Cock Street, Wolverhampton to Norris. Includes letters supposedly by 'Benjamin Vale', a 'spirit' of the 'Spirit Dictation Hall Melo Magnetic

Papers of Richard Hill Norris

Association'. Not all items are dated [1866].

/26: [Norris] to [Dr Gully] [James Manby Gully (1808-1883), physician and hydropath] (draft or copy of letter). Requesting an interview relating to spiritualism with Mr Home, a medium. See also /35.

/27: Letter in Norris' hand (writing anonymously) addressed to Miss Hardinge. The letter was not signed as the writer (presumably Norris) had not 'yet taken any steps publicly in connection with this much tabooed subject' and was afraid the letter may not reach Hardinge. [circa 1866]

/28-33: Emma Hardinge, of Manor House, 7 Cheque Walk, Chelsea, and drafts or copies of letters from Norris to Hardinge. Relating to spiritualism.

/34: G.M. Humphry [Sir George Murray Humphry (1820-1896), surgeon], of Cambridge.

/35: Edward Mackey, of The Dispensary, with letter sent by Norris on reverse side. Relates to Norris' request for an interview regarding the matters seen in connection with Mr Home. See also /26.

/36: Draft or copy of letter from Norris to G.M. Wilkinson.

/37: J.J. Garth Wilkinson [(James John) Garth Wilkinson (1812-1899), Swedenborgian writer and homeopath], of 76 Wimpole Street, Cavendish Square, London to William Wilkinson (his brother). Relates to spiritualism (including a 'spiritual pathology'), homeopathy, and Tom Morton (former doctor at Newcastle Infirmary and University College Hospital), and refers to Norris.

/38-41: W.M. Wilkinson, of New West End, Frankley Road, West Hampstead, and drafts or copies of letters from Norris to Wilkinson. Relating to spiritualism and regarding Norris staying with Wilkinson.

41 letters

Access: Open

Custodial history: Details of former reference numbers are included in the deposit file.

1869 correspondence

1869

Correspondence dated 1869. The letters mainly relate to physiology including research into blood.

Letters from the following correspondents are included:

/1: R.G. Anderson, of 21 St Mary's Road, Westbourne Park, London. Inviting Norris to tea.

/2: (J. Welch?), of London Street, Reading. Requesting a copy of Norris' paper.

/3: George Gulliver [1804-1882, anatomist and physiologist], of Canterbury. Relating to blood.

/4: G.M. Humphry [Sir George Murray Humphry (1820-1896), surgeon], of Cambridge. Regarding Norris' article for a journal.

/5-6: E. Ray Lankester, of Melton House, New West End, Hampstead, with reply from Norris. Lankester offers to publish Norris' paper on 'The mode of formation of Rouleaux in the Blood' in the 'Quarterly Journal of Microscopical Science'.

/7: J.D. Massingham, of St Paul's Vicarage, Warrington. Requesting advice regarding his son regarding a medical career.

/8-9: W. Sharpey [William Sharpey (1802-1880), physiologist], of The Royal Society, London. Relating to

Papers of Richard Hill Norris

Norris' paper and candidature for the Fellowship of the Royal Society.

/10: G.G. Stokes, Secretary of the Royal Society, London. Requesting Norris to read his paper on 'the Laws and Principles concerned in the Aggregation of Blood Corpuscles' at a meeting of the Royal Society.

/11: W.M. Wilkinson, of 44 Lincoln's Inn Fields, London. Thanking Norris for his donation and inviting him to visit.

Letters from the following correspondents are included:

/1: James Edmund, of 5 Savile Row, London. Relating to a paper on iron and steel, and a book 'Pyrology'.

/2: Printed letter from William Hinds, Honorary Secretary of Queen's College, regarding meeting of the Professors and Tutors on 1 April 1875. The letter also has manuscript notes written on it in Norris' hand which

Papers of Richard Hill Norris

appears to be a speech by Norris to be read at the meeting.

/3: William N. Johnson, of 27 Dale Street, Manchester. Relating to supplying purer iron for use in Norris' wire experiments.

3 letters

Access: Open

Custodial history: /1-3 were formerly numbered Norris 194/126-128.

US41/7/18 1876 correspondence 1876

Correspondence dated 1876.

Letters from the following correspondents are included:

/1: T. Spencer Cobbold [Thomas Spencer Cobbold (1828-1886), helminthologist], of 42 Harley Street, Cavendish Square, London.

/2: J. Glover, of 62 Snow Hill, Wolverhampton.

/3-4: J. (Hofneuson?), of Woodlea, Beech Lanes, Birmingham; and Lighthouse Department, Glass Works, near Birmingham. Relating to the first meeting of the Philosophical Society and asking Norris to deliver a paper or 'introduce something of interest'.

/5: William Huggins [Sir William Huggins (1824-1910), astronomer], of Upper Tulse Hill, London. Relating to Huggins' lecture in Birmingham.

/6: G.J. Johnson, of Johnson, Barclay and Johnson Solicitors, 36 Waterloo Street, Birmingham. Relating to Mason's Scientific College, regarding trust funds and requesting suggestions for assisting original scientific research.

/7: Henry A. Pitman [Sir Henry Alfred Pitman (1808-1908), physician], Registrar of the Royal College of Physicians, London. Relating to Norris' exhibit at the College's *Conversazione*.

/8-9: G.G. Stokes [Sir George Gabriel Stokes (1819-1903), physicist], at Cai Derwen, College Road, Upper Bangor; and at Cambridge.

US41/7/19

1877 correspondence

1877

Correspondence dated or appearing to date to 1877.

Letters from the following correspondents are included:

/1: J.A. Balfour, of University of Edinburgh. Thanking Norris for a copy of his papers.

/2: W.F. Barrett, of Royal College of Science, Dublin. Relating to Barrett's visit to Birmingham.

/3: George St. Clair, of 108 Wheelley's Road, Edgbaston. Relating to St. Clair feeling unwell, and going on holiday.

/4-5: Thomas R. Fraser, of Knutsford, Cheshire, with draft or copy of letter from Norris. Request for Fraser to sign the paper sent by McKendrick (see also /6).

/6: John G. McKendrick [John Gray McKendrick (1841-1926), physiologist], of Glasgow College. Asking Norris to sign a form (see also /4-5).

/7: Mary S.G. Nichols, of 72 Abingdon Road, Kensington, London. Relating to spiritualism.

/8-13: G.G. Stokes [Sir George Gabriel Stokes (1819-1903), physicist], at Athenaeum Club, Pall Mall, London; and at Cambridge; with drafts or copies of letters from Norris to Stokes.

/14: Walter White [1811-1893, librarian and writer], of The Royal Society, London. Relating to Norris' diagram.

/15: Hannah Williams, of Cae Derwen, Upper Bangor, North Wales. Informing Norris that Professor Stokes had left from Bangor.

Papers of Richard Hill Norris

Custodial history: Details of former reference numbers are included in the deposit file.

US41/7/20 1878 correspondence 1878

Correspondence dated or appearing to date to 1878. The letters mainly relate to Norris' research into blood.

Letters from the following correspondents are included:

/1: List of correspondence relating to Norris' paper 'On the existence of an invisible corpuscle...' between February 1878 and July 1879.

/2-8: M. Foster [Sir Michael Foster (1836-1907), university teacher], of Trinity College, Cambridge; New Museums, Cambridge; and Shelford, Cambridgeshire, with drafts or copies of letters from Norris. Letters relating to the presenting of Norris' paper to the Royal Society and relating to Norris meeting with Foster.

/9: Hopkin and Williams, Operative Chemists, sent to P. Harris and Co. Relating to osmic acid.

/10: Norris to Dr Humphry. Regarding Norris visiting Cambridge, and asks to meet with Humphry to explain his discoveries in the blood. 14 March.

/11-13: T.H. Huxley [Thomas Henry Huxley, biologist and science educationist], of 4 Marlborough Place, London, and draft or copy of letter from Norris to Huxley. Letters relating to the presenting of Norris' paper to the Royal Society.

/14: Draft or copy of letter from Norris to Dr McKendrick. Regarding McKendrick's illness, meeting Dr Foster, Norris' paper (including Foster's critical views of the paper), and Norris' criticisms of the Royal Society. [circa 1878]

/15-16: W.J. Sanderson, of (49 Queen Anne Avenue?), and draft or copy of letter from Norris. Relating to Norris' work on blood.

/17-19: W. Sharpey [William Sharpey, physiologist], of 50 Torrington Square, [London], and draft or copy of letters from Norris. Relating to Norris' paper on blood, and presenting the paper to the Royal Society.

Papers of Richard Hill Norris

/20: William Stirling, of University of Aberdeen, Physiological Laboratory. Relating to Norris' paper on blood.

/21: W.F. Wade [Sir Willoughby Francis Wade, physician], of 24 Temple Row, Birmingham. Relating to meeting with Dr Philip Frank of Cannes.

/22-23: Walter White [1811-1893, librarian and writer, of The Royal Society, London, with draft or copy of letter from Norris. Relating to Norris' paper offered to the Society and an offer of microphotographs for the Society's conversazione.

23 letters

Custodial history: Details of former reference numbers are included in the deposit file.

US41/7/21 1879 correspondence 1879

Correspondence dated or appearing to date to 1879. The letters mainly relate to Norris' research into blood.

Letters from the following correspondents are included:

/1: (C. Binf?), of Bonn. Relating to Norris' paper on blood.

/2: Walter R. Browne, Secretary of the Institution of Mechanical Engineers addressed to Professor Gore, 50 Islington Row, Birmingham. Relating to the discovery of a phenomenon.

/3: J.J. Charles, of Queen's College, Cork. Relating to blood.

/4-5: H.W. Crosskey [Henry William Crosskey (1826-1893), Unitarian minister, social reformer and geologist], Secretary of the Birmingham Philosophical Society, of 28 George Road. Relating to publishing Norris' paper in the Society's journal.

/6-7: J. Lardner Green, of Harcourt Terrace, Salisbury. Relating mainly to the illness and death of Green's wife.

/8: George Gulliver [anatomist and physiologist 1804-1882], of Canterbury. Relating to Norris' work on blood.

Papers of Richard Hill Norris

/9: (John Harden?), of King Street, Lancaster. Requesting a copy of Norris' paper.

/10: Alice M. Hart [Alice Marian Hart], of 38 Wimpole Street, [London]. Relating to blood. This series of correspondence continues in 1880 (see US41/7/22/33-38)

/11: Alexander Henry, of the British Medical Journal, 161A Strand, London. Requesting an account of Norris' demonstration of blood given at Cork.

/12: (J.E. He...thwaite?), of Bawtry, Yorkshire. Regarding Miss Wood of Hodsock Grange near Worksop.

/13: Noel Gueneau de Mushy, of 4 rue Volney, Paris. Relating to Norris' work on blood.

/14-15: Henry Power, of 37A Great Cumberland Place, Hyde Park. Relating to Norris' paper on blood.

/16: Herbert Rix, Clerk of the Royal Society, London. Acknowledgement of receipt of paper by Norris. The letter is addressed to Dr G. Gore.

/17-18: Priestley Smith [(Joseph) Priestley Smith (1845-1933), ophthalmologist] of 21 Broad Street, Birmingham, with draft or copy of reply from Norris. Regarding Smith's book and Churchill's paper.

/19: James Wakley [James Goodchild Wakley], Editor of 'The Lancet', 423 Strand, London. Regarding contributions to the 'Lancet'.

/20: Alfred R. Wallace [Alfred Russel Wallace (1823-1913), naturalist, evolutionary theorist and social critic], of Waldrow Edge, Duppers Hill, Croydon. Relating to jobs at Mason's College, and other matters. See also US41/7/22/1 and 40.

/21-22: S. Wilks [Sir Samuel Wilks (1824-1911), physician], of 77 Grosvenor Street, and draft letter from Norris to Wilks. Relating to Wilks' address at the College of Physicians and meeting before a soiree.

22 letters

US41/7/22

1880 correspondence

[1880]

Correspondence dated or appearing to date to 1880. The majority of letters relate to Norris' research into blood, although various letters relating to other topics are also included.

Letters from the following correspondents are included:

/1: Part of (draft?) letter in Norris' hand to unknown person. Relates to George Gore and regarding positions for Alfred Russel Wallace and George Gore at Mason College. See also /32, /40 and US41/7/21/20. [circa 1880]

/2-22: Letters and receipts from The Autotype Company, of 36 Rathbone Place, London; Brownlow Road, Ealing Dene, London; and 531 Oxford Street, London. Relating to the printing of micro-photographs.

/23-24: W. Marrant Baker, of 26 Wimpole Street, London. Relating to Norris' paper on blood.

/25-26: Herbert B. Berkeley, of The Platinotype Company, 2 St Mildred's Terrace, Bromley Road, Lee, London. Relating to printing.

/27-28: H.W. Crosskey [Henry William Crosskey (1826-1893), Unitarian minister, social reformer and geologist], at Half Way, Bankfoot by Perth. Part of /27 is missing.

/29: G. Dowdeswell, of Gloucester. Requesting a copy of Norris' paper on blood.

/30: (H.C. Fulford?), of Clopton House, Birchfield. Enclosed cheque to Autotype Co. Not dated. [1880]

/31: S.E. Gladstone [Stephen Edward Gladstone, rector], of Hawarden Rectory, Chester. Enclosing cheque for kindness to Mr Connor at the Walsall College Hospital.

/32: G. Gore [George Gore (1826-1908), electrochemist and scientific writer], of 67 Broad Street. Regarding Mason College and Gore's new laboratory.

/33-38: Alice M. Hart [Alice Marian Hart], of 38 Wimpole Street, [London] and 6 Rue de la Sorbonne, Paris, and draft or copy of letter from Norris to Mrs Hart. Letters relating to blood. Continuation of correspondence from 1879 (see US41/7/21/10).

Papers of Richard Hill Norris

- /39: John Harden, of King Street, Lancaster. Relating to Norris' pamphlet on blood.
- /40: Thomas P. Heslop [Thomas Pretious Heslop (1823-1885), physician], of Birmingham regarding Alfred Russel Wallace's enquiry regarding Mason's College (see US41/7/21/20).
- /41: George Hookham, of Brueton Street, Birmingham. Regarding council meeting [possibly of the Birmingham Philosophical Society?].
- /42: G.M. Humphry [Sir George Murray Humphry (1820-1896), surgeon], of Grove Lodge, Cambridge. Thanking Norris for a copy of his book and regarding accommodation for a meeting.
- /43-44: Henry R. Hutton, Demonstrator of Physiology, of Physiological Laboratory, St Thomas's Hospital, London. Regarding Norris' paper on blood.
- /45: (... Cha...?), of 1 St James's Mount, Liverpool. Thanking Norris for a copy of his paper on blood.
- /46-47: J. Lardner Green, of Harcourt Terrace, Salisbury. Relating to Norris' paper on blood.
- /48: J.G. McKendrick [John Gray McKendrick (1841-1926), physiologist], of 33 Westbourne Gardens, Glasgow. Thanking Norris for a copy of his book on blood.
- /49: William P. Marshall, of 247 Monument Road, Birmingham. Sending a copy of Chernoff's paper on cast steel.
- /50-51: William Murrell, of 38 Weymouth Street, London. Relating to blood and thanking Norris for a copy of his paper.
- /52-53: Dr Theodor Schuchardt, of Goerlitz sent to Messrs Philip Harris and Co, Wholesale Chemists. Relating to osmic acid, with enclosed printed leaflet regarding a 'solution for preservation'.
- /54-55: Edwin A. Sterling, of The Reading Room, Guy's Hospital. Regarding Norris' article on blood
- /56: William Stirling, of The University, Aberdeen. Thanking Norris for a copy of his paper on blood.

Papers of Richard Hill Norris

/57: C. Piazzzi Smyth [Charles Piazzzi Smyth (1819-1900), astronomer], of the Royal Observatory, Edinburgh.

/58-62: Alfred R. Wallace [Alfred Russel Wallace (1823-1913), naturalist, evolutionary theorist and social critic], of Pen-y-bryn, St Peters Road, Croydon; and Waldron Edge, Duppas Hill, Croydon. 1880. Letters regarding various topics including Wallace's visit to Birmingham, and spiritualism.

/63: C.G. Wheelhouse [Claudius Galen Wheelhouse, surgeon], of Hillary Place, Leeds. Relating to Norris' paper.

62 letters, 1 leaflet

Access: Open

Custodial history: Details of former reference numbers are included in the deposit file.

US41/7/23

1881 correspondence

[1881]

Correspondence dated or appearing to date to 1881. The majority of letters relate to Norris' research into blood, although various letters relating to other topics are also included.

Letters from the following correspondents are included:

/1: Arthur Adams, of Broomfield Place, Smethwick. Relating to blood.

/2-3: Richard John Anderson, of 58 Willington Park, Belfast. Letter requesting a testimonial for Anderson's application for the Linacre Professorship of Physiology with enclosed printed letter from Anderson applying for the position.

/4-6: David Archibald, of 71 South Street, St Andrews. Letter asking Norris to join the Committee of Management for the 'Fund for the Better Endowment of the Chandos Chair of Medicine and Anatomy in the University of St Andrews', letter thanking him for joining the committee, and receipt for donation.

/7: F.C. Arkwright, of Ardoch Lodge, Strathyre, Stirling. Granting permission to fish on Arkwright's side of the River Derwent near Matlock [Derbyshire].

Papers of Richard Hill Norris

- /8-10: The Autotype Company, of Ealing Dene, London and 531 Oxford Street, London. Letters and receipt.
- /11-12: Lionel S. Beale [Lionel Smith Beale (1828-1906), physician and microscopist], of 61 Grosvenor Street, London, and letter from Norris to Beale. Relating to blood.
- /13: J. Gibbs Blake, of 24 Bennetts Hill, Birmingham.
- /14-15: Henry W. Crosskey [Henry William Crosskey (1826-1893), Unitarian minister, social reformer and geologist], Secretary of Birmingham Philosophical Society, 28 George Road, [Birmingham]. Letter regarding copies of Dr Heslop's note on Norris' papers, and letter requesting Norris to chair a meeting of the Society.
- /16: W.R. Gowers [Sir William Richard Gowers (1845-1915), physician], of 50 Queen Anne Street, Cavendish Square, London. Relating to blood and anaemia.
- /17: George Gulliver [anatomist and physiologist 1804-1882], of Canterbury (postcard). Relating to Norris' research on blood.
- /18: W. Hinds [William Hinds], Honorary Secretary of Queen's College, Birmingham. Requesting Norris to join the test examining board in physiology.
- /19-20: Edmund H. Howlett, of Manchester Royal Infirmary. Discussing the findings of Howlett's experiments on blood relating to Norris' research on 'the third corpuscular element'.
- /21: Furneaux Jordan, of Gate House, New Edmund Street, Birmingham. Thanking Norris for a copy of his book.
- /22: Joseph Lewis, Secretary of Queen's College, of 21 Paradise Street, Birmingham. Request to deliver a series of lectures for students on practical physiology and physiology.
- /23-25: (Charles A. MacMillan?), of Waterloo Road South, Wolverhampton. Relating to the spleen, the absorption band of serum, blood etc.
- /26-31: Dr L. Malassez, of Laboratoire d' Histologie du College de France, Paris; and 168 Boulevard St-Germain, with drafts or copies of letters from Norris, an English translation of one of the letters, and a visiting card. Relating to blood.

Papers of Richard Hill Norris

/32: A.K. Norris, of 3 Birchfield Road, Birmingham.
Telegram regarding Marlow.

/33: W. North, of Reading Room, University College,
London. References to Osler's and Schultze's works on
blood.

/34: Lyon Playfair [politician and chemist], of 68 Onslow
Gardens, South Kensington, London. Inviting Norris to
join a committee to promote Playfair's re-election for the
universities of Edinburgh and St Andrew's.

/35: Henry Power (postcard).

/36: (Dr D.W. Simeon?), of Moseley. It is unclear as to
what the letter refers, but it states that it is 'a case of
imminent peril' and greatly stresses the urgency of Norris
carrying out some unidentified action. The letter is
marked 'Burn when read'.

/37-38: (Marcus M. Starkey?), of Fallowfield, Manchester.
Note of agreement and letter relating to the translation of
Norris' work on blood into French.

/39: Samuel Timmins of Elvetham Lodge, Birmingham.
Memorandum providing notice of a seance to be held.

36 letters, 2 receipts, 1 visiting card

Access: Open

Custodial history: Details of former reference numbers
are included in the deposit file.

US41/7/24 1882 correspondence [1882]

Correspondence dated or appearing to date to 1882.
Most of the correspondence relates to Norris' book 'The
Physiology and Pathology of the Blood'.

Letters from the following correspondents are included:

/1: W. de W. Abney [Sir William de Wiveleslie Abney
(1843-1920), civil servant and photographic scientist], of
3 St Albans Road, Kensington, London. Thanking Norris
for a copy of his book. Found in envelope postmarked
1882.

/2: Henry W. Acland [Sir Henry Wentworth Acland (1815-
1900), physician].

Papers of Richard Hill Norris

/3: T. Clifford Allbutt [Sir (Thomas) Clifford Allbutt (1836-1925), physician], of Carr Manor, Meanwood, Leeds. Thanking Norris for a copy of his book 'The Physiology and Pathology of the Blood'. Marked '1882' in pencil.

/4-5: T.H. Bartleet [Professor of Physiology at Queen's College, Birmingham], of 27 Newhall Street, Birmingham. One is marked '1882' in pencil, one is dated 1882.

/6: Lionel S. Beale [Lionel Smith Beale (1828-1906), physician and microscopist], of 61 Grosvenor Street, London. Thanking Norris for a copy of his book.

/7: James Risdon Bennett [Sir James Risdon Bennett (1809-1891), physician], of 22 Cavendish Square, [London]. Thanking Norris for a copy of his book on blood.

/8-10: C. Binz, of Bonn, Germany. Postcard relating to a periodical sent to Norris, letter relating to periodicals and death of Norris' child, and postcard (in German) thanking Norris for his book.

/11: J. Gibbs Blake, of Highfield Gate, Harborne Road, Edgbaston, [Birmingham]. Thanking Norris for a copy of his book on blood.

/12: Alex Bottle, of 8 Easy Row, Birmingham. Thanking Norris for a copy of his book on blood.

/13: Samuel Bull, of Noorthkey School, Cambridge. Thanking Norris for a copy of his book on blood and discussing other matters.

/14: William B. Carpenter [William Benjamin Carpenter (1813-1885), biologist and university administrator], of 56 Regents Park Road, London. Thanking Norris for a copy of his book on blood, and relating to micro-photography.

/15: (... Charles?), of 3 Rockspring Terrace, St Sulle's, Cork, [Ireland]. Thanking Norris for a copy of his book on blood.

/16: John Chatto, Librarian of the Royal College of Surgeons of England. Relating to Norris' papers on blood.

/17: John Cleland, of 2 The College, Glasgow. Relating to Norris' book on blood.

/18: Henry W. Crosskey [Henry William Crosskey (1826-1893), Unitarian minister, social reformer and geologist],

Papers of Richard Hill Norris

of 28 George Road, [Birmingham]. Thanking Norris for a copy of his book on blood.

/19-20: Charles L. Dana M.D., of 66 West 46th Street, New York, [United States of America]. Relating to Norris' paper on the blood.

/21: Herbert Davies [1818-1885, physician], of 23 Finsbury Square, [London]. Relating to a 'conversazione' proposed to be held at Davies' house.

/22-23: James T.R. Davison, of Royal Southern Hospital, Liverpool. Relating to blood and a paper by Davison.

/24: Professor Donders (card). Postmarked 1882.

/25: G. Dowdeswell, of 3 Homefield Crescent, Wimbledon. Thanking Norris for a copy of his book on blood.

/26-27: S. Dyer for Ballantyne Hanson and Co [printers], of 4 Chandos Street, Charing Cross, London. Relating to printing Norris' pamphlet, with a printed page of an article (sample page sent with letter?).

/28: Robert William Edginton, of 416 Bristol Road, [Birmingham]. Thanking Norris for a copy of his book on blood.

/29: David (Farrier?), of 16 Upper Berkeley Street, Portman Square, London. Thanking Norris for a copy of his book on blood.

/30: B. Foster [Sir Balthazar Walter Foster (1840-1913), physician and politician], of 25 Hagley Road, Edgbaston and 14 Temple Row, Birmingham. Thanking Norris for a copy of his book on blood.

/31: Francis Fowke, of 40 Nottingham Place, London. Regarding Norris' book on blood.

/32: Thomas R. Fraser [possibly Sir Thomas Richard Fraser, pharmacologist, 1841-1920?], of University of Edinburgh. Thanking Norris for a copy of his book on blood and regarding Fraser's book on blood.

/33: E. Fulford, of Norwood House, Erdington, [Birmingham]. Thanking Norris for a copy of his book on blood. Postmarked 1882.

Papers of Richard Hill Norris

/34-37: Sampson Gamgee, of 22 Broad Street, [Birmingham], with draft or copy of letter from Norris to Gamgee. Relating to Norris' work on blood.

/38: W.R. Gowers [Sir William Richard Gowers (1845-1915), physician], of 50 Queen Anne Street, Cavendish Square, London. Thanking Norris for a copy of his book on blood.

/39: William W. Gull [Sir William Withey Gull (1816-1890), physician], of 74 Brook Street, Grosvenor Square, London. Thanking Norris for a copy of his book on blood.

/40: George Gulliver (senior) [1804-1882, anatomist and physiologist], of Canterbury. Relating to Norris' book on blood.

/41: George Gulliver (junior), of Old Dover Road, Canterbury. Relating to the death of his father [George Gulliver (senior)]. [1882]

/42: John Haycraft, of Sir Josiah Mason's Science College [Mason College], Birmingham. Thanking Norris for a copy of his book on blood.

/43: Thomas P. Heslop [Thomas Pretious Heslop (1823-1885), physician]. Thanking Norris for a copy of his book on blood and a copy sent to Mason College.

/44-45: Frances Hoggan [Frances Elizabeth Hoggan nee Morgan, physician and social reformer], of 7 Trevor Terrace, Rutland Gate, London. Relating to sexual self-restraint, thanking Norris for his book and other matters.

/46: Joseph D. Hooker [Sir Joseph Dalton Hooker, botanist], of Royal Gardens Kew. Thanking Norris for a copy of his book on blood.

/47: G.M. Humphry [Sir George Murray Humphry (1820-1896), surgeon], of Anatomical Museum, Cambridge. Thanking Norris for a copy of his book on blood.

/48: J. Hunt, of 23 Temple Row, Birmingham. Thanking Norris for a copy of his book on blood.

/49: T.H. Huxley [Thomas Henry Huxley, biologist and science educationist], of 4 Marlborough Place, Abbey Road, London. Thanking Norris for a copy of his book on blood.

Papers of Richard Hill Norris

/50: W. Jenner [Sir William Jenner, physician], of 63 Brook Street, Grosvenor Square, London. Thanking Norris for a copy of his work on mammalian blood.

/51: F. Wharton Jones, at 2 Katrine Villas, Madeira Road, Ventnor, Isle of Wight. Thanking Norris for a copy of his book.

/52: James P. Joule [James Prescott Joule, physicist], of 12 Wardle Road, Sale, near Manchester. Thanking Norris for a copy of 'The Physiology and Pathology of the Blood'.

/53: E. Klein [Edward Emanuel Klein, histologist and bacteriologist], of 94 Philbeach Gardens, Earls Court, London. Thanking Norris for a copy of his book on blood.

/54: Kuhne, of Heidelberg, Germany. Postcard in German, with annotated translation, thanking Norris for a copy of his book.

/55-57: Sophia F.M. Legge, of Whittington, Lichfield, with copy or draft of letter from Norris and notes regarding the case of Lilla Bates. Relating to homeopathy.

/58: Professor R. Lepine, of Place gensone, Lyon. Thanking Norris for a copy of his book on blood. Envelope containing letter is postmarked 1882.

/59: R. Levett, of Avonmore, Moseley. Thanking Norris for a copy of his book on blood.

/60: Joseph Lewis, Secretary of Queen's College, of 21 Paradise Street, Birmingham. Informing Norris of resolution passed to appoint him as a governor of the college.

/61: London Medical Society, 11 Chandos Street, Cavendish Square, London. Thanking Norris for a copy of his book on blood.

/62: E.S. Machin, of Erdington, Birmingham. Thanking Norris for a copy of his book on blood.

/63: C.A. MacMunn [Charles Alexander MacMunn (1852-1911), physician and spectroscopist], of Oakleigh, Wolverhampton. Relating to Norris' book on blood.

/64: Edward Malins, of 8 Old Square, Birmingham. Thanking Norris for a copy of his book on blood.

Papers of Richard Hill Norris

/65: Francis Mason [surgeon], of 5 Brook Street, Grosvenor Square, London. Thanking Norris for a copy of his book on blood presented to the Medical Society.

/66: George H. Morley, Secretary of Sir Josiah Mason's Science College (Mason College), Birmingham. Informing Norris of resolution passed to allow him to use the college's library.

/67: W. Moxon [Walter Moxon (1836-1886), physician], of 6 Finsbury Circus, London. Thanking Norris for a copy of his book on blood.

/68: (N Genneau di Mu...y?), of 73 rue de Courcelles, [Paris, France]. Thanking Norris for a copy of his book on blood. Postmarked 1882.

/69: W.M. Ord [William Miller Ord, physician and medical administrator], of 7 Brook Street, Grosvenor Square, London. Thanking Norris for a copy of his book on blood.

/70-71: Letter from Dr Heslop [Thomas Pretious Heslop (1823-1885), physician], forwarding to Norris a letter from Richard Owen [Sir Richard Owen (1804–1892), comparative anatomist and palaeontologist] (of Shaw Lodge, Mortlake, Richmond Park) to Dr Heslop. A copy of Owen's letter in Norris' hand is included (Heslop requested that Owen's original letter should be returned to him). The letter from Owen relates to Norris' book and other matters.

/72: James Paget [Sir James Paget (1814-1899), surgeon], of 1 Harewood Place, Hanover Square, London. Thanking Norris for a copy of his book on blood.

/73: (S.H.?) Parker, Instrument Makers, of 5 and 6 St Mary's Row, Birmingham. Thanking Norris for a copy of his book.

/74: W.K. Parker [William Kitchen Parker, comparative anatomist and zoologist], of 36 Claverton Street, London. Thanking Norris for a copy of his book on blood.

/75: F.W. Pavy [Frederick William Pavy, physician and physiologist], of 35 Grosvenor Street, Grosvenor Square, London. Thanking Norris for a copy of his book on blood.

/76: Henry Power, of 37a Great Cumberland Street, of Hyde Park, London. Thanking Norris for a copy of his book on blood.

Papers of Richard Hill Norris

/77-78: W. Preyer [Thierry William Preyer, physiologist and advocate of Darwinism], of Jena. Postcard thanking Norris for a copy of his book on blood, and Preyer's visiting card.

/79: P.A. Pye-Smith, of 56 Harley Street, London. Thanking Norris for a copy of his book on blood.

/80-83: Thomas Shearman Ralph, of Australia (staying at 13 Alfred Place, Bedford Square, London). Relating to Norris' work on blood.

/84: Thomas Richards, of Temple House, Bath Row, Birmingham. Thanking Norris for a copy of his book on blood.

/85: G.J. Romanes [George John Romanes, evolutionary biologist], of Geanies, Rossshire, N.B. Postcard thanking Norris for a copy of his book. Postmarked 1882.

/86: Draft or copy of letter from Norris to Royal Academy of Medicine, Turin. Regarding the Riberi Prize and his work on the physiology and pathology of the blood. [1882]

/87: James Russell, of New Hall Street, [Birmingham]. Thanking Norris for a copy of his book on blood.

/88: W. Rutherford [possibly William Rutherford (1839-1899), physiologist], of Edinburgh. Postcard thanking Norris for a copy of his book. Postmarked 1882.

/89-91: George St. Clair, of 127 Bristol Road, Edgbaston, [Birmingham]. Relating to Dr Woollcombe's theory on the rotation of the red blood corpuscles. See also /118.

/92: William S. Savory [Sir William Scovell Savory], of 66 Brook Street, Grosvenor Square, [London]. Thanking Norris for a copy of his book on blood. Postmarked 1882.

/93: George Shaw, of 37 Temple Street, Birmingham. Thanking Norris for a copy of his book on blood.

/94: Robert M. Simon, of 27 Newhall Street, Birmingham. Thanking Norris for a copy of his book on blood, with some criticisms.

/95: D.W. Simon, of Moseley. Thanking Norris for a copy of his book on blood.

Papers of Richard Hill Norris

/96: Priestley Smith [(Joseph) Priestley Smith, ophthalmologist], of 21 Broad Street, Birmingham. Thanking Norris for a copy of his book on blood.

/97-99: Smith Elder and Co [publishers], of 15 Waterloo Place, London, with draft or copy of letter from Norris. Regarding advertising Norris' book.

/100-103: (Marcus M. Starkey?), of Fallowfield, Manchester. Relating to the copying and translation into French of Norris' book.

/104: Thomas Taylor. Thanking Norris for a copy of his book on blood. [1882]

/105: Robert Tilley, of 70 (Monroe?) Street, Chicago, U.S.A. Relating to Norris' book on blood.

/106: Edward Trimmer, Secretary of the Royal College of Surgeons of England. Thanking Norris for a copy of his book on blood donated to the Library of the College.

/107: John Tyndall [physicist and mountaineer], of Royal Institution of Great Britain. Thanking Norris for a copy of his book on blood.

/108-109: W.F. Wade [Sir Willoughby Francis Wade, physician], of 24 Temple Row, Birmingham. Letter thanking Norris for a copy of his work and postcard suggesting that Norris should send a copy of his book to G. Dowdeswell.

/110: Alfred R. Wallace [Alfred Russel Wallace (1823-1913), naturalist, evolutionary theorist and social critic, of Frith Hill, Godalming]. Thanking Norris' for a copy of his book on blood, and relating to Wallace's book on land and the Land Nationalisation Society.

/111: H.W. Watson [Henry William Watson, mathematician and Church of England clergyman], of The Rectory, Berkeswell [Berkswell], Coventry. Thanking Norris for a copy of his book on blood.

/112-114: C.G. Wheelhouse, President of the Council of the British Medical Association, of Hillary Place, Leeds, with drafts or copies (two versions) of reply from Norris. Invitation for Norris to be Vice President of the Anatomy and Physiology Section at the British Medical Association Annual Meeting in 1883.

Papers of Richard Hill Norris

/115: Samuel Wilks [Sir Samuel Wilks (1824-1911), physician], of 72 Grosvenor Street, London. Thanking Norris for a copy of his book on blood.

/116: Frederick Willcocks, of 14 Mandeville Place, Manchester Square, London. Thanking Norris for a copy of his book on blood, and relating to Willcocks' papers.

/117: C.J. Woodward, of Birmingham and Midland Institute, Birmingham. Thanking Norris for a copy of his book on blood.

/118: R.W. Woollcombe, of 14 Acre Place, Stoke Devonport. Letter presumably sent to St Clair and enclosed with /91, regarding Woollcombe's theories on blood.

1883 correspondence

1883

Correspondence dated or appearing to date to 1883, including several letters relating to his work 'The Physiology and Pathology of the Blood'.

Letters from the following correspondents are included:

/1-2: R.J. Anderson [Richard John Anderson], of 58 Wellington Park, Belfast. Requesting a testimonial for his application for the Professorship of Anatomy and Physiology at Queen's College, Belfast; and thanking Norris for his testimonial.

/3: Frederic C. Arkwright, of Willersley, Cromford, Derbyshire. Thanking Norris for a copy of his book.

/4: James E. Bagnall, of 84 Witton Road, Aston, Birmingham. Thanking Norris for a copy of his book on blood.

/5: James Barr, for British Medical Association Annual Meeting at Liverpool. Thanking Norris for a copy of his book and pamphlet on blood, and regarding an exhibition of Norris' photographs at the Annual Meeting.

Papers of Richard Hill Norris

/6: N. Caton, of 18a Abercromby Square, Liverpool.
Thanking Norris for a copy of his book on blood.

/7-8: (A.?) Charles, of Royal University, Dublin.
Regarding a testimonial to support Charles.

/9: F. de Chaumont, of Laboratory Army Medical School,
Royal Victoria Hospital, Netley. Thanking Norris for a
copy of his book on blood and two pamphlets.

/10: T. Spencer Cobbold [Thomas Spencer Cobbold
(1828-1886), helminthologist], of 74 Portsdown Road,
Maida Vale, London. Thanking Norris for a copy of his
book on blood.

/11-13: Envelope labelled 'Correspondence with Dr Corke
on the Emma Davies Case' containing two letters from
Cecil A. Corke, of Prescott, Baschurch, Shropshire, (16?)
and 19 November 1883; and a postcard addressed to Mr
E. Milbourne, of 26 Temple Street, Birmingham dated 15
November 1883.

/14: Alfred J.H. Crespi, of Wimborne. Relating to a friend
of Crespi's working with the microscope and spectrum
analysis.

/15: W.H. Dallinger [William Henry Dallinger (1842-1909),
Wesleyan Methodist minister and biologist], of Wesley
College, Sheffield. Thanking Norris for a copy of his book
on blood.

/16: J.C. Dalton, of 43 West 48th Street, New York.
Thanking Norris for a copy of his book on blood.
Thanking Norris for a copy of his book on blood.

/17: Major John Davis, of 2 Edinburgh Mansions,
(Victoria?), London. Thanking Norris for a copy of his
book on blood.

/18: James T.R. Davison, of Royal Southern Hospital,
Liverpool. Relating to Norris' work on blood.

/19: G. Dean, of Spring Hill College, Moseley, near
Birmingham. Thanking Norris for a copy of his book on
blood.

/20: James Edmunds, of 8 Grafton Street, Piccadilly,
London. Thanking Norris for a copy of his book on blood.

/21: A. Flint, of 418 Fifth Avenue, New York. Thanking
Norris for a copy of his book on blood.

Papers of Richard Hill Norris

/22: H.C. Fulford, of Clopton House, Birchfield. Thanking Norris for a copy of his book on blood.

/23: Arthur Gamgee [(1841-1909), physiologist], of The Owens College, Manchester. Thanking Norris for a copy of his book on blood. Found in envelope postmarked 1883.

/24: J. William Gifford, of Snowdon House, Chard. Relating to microscopy. See also /45.

/25: G. Gore [George Gore (1826-1908), electrochemist and scientific writer], of Institute of Scientific Research, 67 Broad Street, Birmingham. Relating to the certificates of candidates at the Royal Society.

/26: Thad. S. Up de Graff, surgeon and proprietor of Elmira Surgical Institute, 111 and 113 Hudson Street, Elmira, New York. Relating to Norris' book on blood and asking whether it is possible to restore dried blood and identify whether it came from animal or man.

/27-28: E. Hyla Greves, of 53 Rodney Street, Liverpool. Relating to blood and regarding slides to demonstrate Norris' work on blood.

/29: William W. Gull [Sir William Withey Gull (1816-1890), physician], of 74 Brook Street, Grosvenor Square, London. Thanking Norris for a copy of his book on blood.

/30: Alfred Harrison, of Failand Lodge, Guthrie Road, Clifton. Relating to the proposed reading at the Microscopical Society of a paper on the blood corpuscles by Harrison.

/31: Reginald Harrison [(1837-1908), surgeon], of 38 Rodney Street, Liverpool. Thanking Norris for a copy of his book on blood.

/32: Arthur H. Hassall [Arthur Hill Hassall (1817-1894), physician and microscopist], of 36 Bedford Place, Russell Square, London and Villa Bracco, San Remo. Thanking Norris for a copy of his book on blood.

/33: (?) Hughes, of Wood House, Handsworth Wood, Birmingham. Thanking Norris for a copy of his book on blood.

/34-35: J. Kenward, of Eddystone House, Harborne. Letter relating to a report on blood parasites, and letter

Papers of Richard Hill Norris

regarding the Birmingham Philosophical Society dinner at which a toast was to be given to Norris.

/36: Sub-editor of the Lancet. Regarding publication of Norris' paper on blood in the journal.

/37: Christian Loven, Stockholm. Thanking Norris for a copy of his book on blood.

/38: C.A. MacMunn [Charles Alexander MacMunn], of Oakleigh, Wolverhampton. Relating to blood.

/39: William P. Marshall, of 15 Augustus Road, Birmingham. Thanking Norris for a copy of his book on blood, and relating to Marshall's paper on (permututida?).

/40: William Matthews, of 60 Harborne Road, Birmingham. Thanking Norris for a copy of his book on blood.

/41-43: Professor Dr P.L. Panum, of Bredgade 62, Copenhagen, President of the organizing committee of the Physiological Section of the International Medical Congress in 1884. Letter and printed circular letters.

/44: F.M. Purser, of 3 Wilton (Terrace?), Dublin. Thanking Norris for a copy of his book on blood.

/45: W.H. Raper, of Great Wakering. Relating to questions relating to microscopy from Mr Gifford (see also /24) referred to Raper by Norris, about Raper's local area and family, and other personal matters.

/46: H.P. Rowditch [Henry Pickering Rowditch], of Harvard Medical School, Boston, [United States of America]. Relating to Norris' book on blood.

/47: Thomas Savage, of 12 Old Square, Birmingham. Thanking Norris for a copy of his book on blood.

/48-50: Smith, Elder and Co., of 15 Waterloo Place, London. Letters and account sheet regarding publication of 'The Physiology and Pathology of the Blood'.

/51: C. Piazzzi Smyth [Charles Piazzzi Smyth (1819-1900), astronomer], of 15 Royal Terrace, Edinburgh. Relating to Norris' book on blood and relating to photography.

/52: Herbert Spencer [1820-1903, philosopher, social theorist and sociologist], of 38 Queen's Gardens,

Papers of Richard Hill Norris

Bayswater, London. Thanking Norris for a copy of his book on blood.

/53-54: John K. Spender, of 17 Circus, Bath. Regarding Mrs Hickman of Birmingham, who had rheumatoid arthritis; and thanking Norris for a copy of his book on blood.

/55: William Stirling, of the University of Aberdeen. Thanking Norris for a copy of his book on blood.

/56: Dr Strange, of Foregate Street, Worcester. Relating to Norris' book on blood.

/57: Edmund Tonks, of Parkwood Grange, Knowle, Warwickshire. Thanking Norris for a copy of his book on blood.

/58: W. Turner [Sir William Turner (1832-1916), anatomist and university administrator], of the University of Edinburgh. Thanking Norris for a copy of his book on blood.

/59-60: Alfred R. Wallace [Alfred Russel Wallace (1823-1913), naturalist, evolutionary theorist and social critic], of Frith Hill, Godalming. Letters regarding visit to Birmingham for lecture on land nationalization.

/61: Augustus Waller [Augustus Desire Waller (1856-1922), physiologist], of 26 Gordon Square, London. Thanking Norris for a copy of his book on blood, and relating to micro-photography.

/62: Francis Warner, of 24 Harley Street, Cavendish Square, London. Thanking Norris for a copy of his book on blood.

/63: (J. Weston?), of The Mansion House, Bristol. Thanking Norris for a copy of his book on blood.

/64-65: Charles J. Wright, of Lynton Villa, Virginia Road, Leeds. Relating to Queens College and Mason's College, and to Norris' book on blood.

/66: R.W. Woollcombe, of 14 Acre Place, Stoke, Devonport. Thanking Norris for a copy of his book on blood.

65 letters, 1 account sheet

Papers of Richard Hill Norris

Custodial history: Details of former reference numbers are included in the deposit file.

US41/7/26 1884 correspondence [1884]

Correspondence dated or appearing to date to 1884.
Most letters relate to Norris' research into blood.

Letters from the following correspondents are included:

/1: Norris to unknown person (draft or copy of letter) regarding paper read at the [International Medical] Congress. [circa 1884].

/2: (not signed) of 21 The Grove, Villa Road, Birmingham. Letter thanking Norris for a book, and providing details of the titles of various books that the sender believed 'every truth seeking earnest soul should become acquainted'.

/3: George W. Chapman, of 136 South Lambeth Road, London. Relates to Chapman staying with Mr Miller (possibly Chapman was an apprentice to Miller?).

/4-5: John Cleland, of 2 The College, Glasgow. Regarding Dr Allen, and the post of Professor of Anatomy at the Birmingham College, and relating to Norris' book on blood.

/6: Norris to Dr Crosskey.

/7-8: James T.R. Davison, staying at Grand Hotel des Etrangers, Paris, and Lisbon. Letter requesting a testimonial for a job in Buenos Aires, and letter thanking him for the testimonial.

/9: Copy of letter from Falbe (Legation of Denmark) on behalf of the King of Denmark to Sir James Paget. Relates to an address presented to the King of Denmark in sympathy of the destruction of the Palace of Christiansborg. See also /20.

/10: H.C. Fulford, (on headed paper from Clopton House, Birchfield but with address crossed out). Regrets that Norris was unsatisfied with the 'result of the publication'.

/11-12: Dr H. Handford, of 8 Regent Street, Nottingham. Regarding a paper on blood to be read by Handford at the Nottingham Naturalists' Society, requesting a slide showing the 'third corpuscle' and letter thanking Norris for a copy of his book.

Papers of Richard Hill Norris

/13-15: Alfred James Harrison, of Failand Lodge, Guthrie Road, Clifton. Relating to Norris' work on blood, and regarding Harrison's paper read at the Bristol Microscopical Society.

/16-17: Norris to Professor Hayen. Two versions of a letter regarding discussions on blood at the International Medical Congress at Copenhagen.

/18: John G. McKendrick [John Gray McKendrick (1841-1926), physiologist], of 53 Westbourne Gardens, Glasgow. Relating to Norris' work on blood, and McKendrick's eye problems.

/19: J. Morley, of Birmingham Natural History and Microscopical Society, and of 24 Sherborne Road. Informs Norris that he has been appointed as delegate for the Society to the meeting of the British Association, to try to persuade the Association to have its meeting in Birmingham in 1886.

/20: Henry Morris of 2 Mansfield Street, Portland Place, London. Regarding an address to be send by members of the Copenhagen Congress in regret of the fire at the palace of Christenborg. See also /9.

/21: Ernest Morton, of Wilson Road. Relating to the translation of Bizzozero's pamphlet, and Morton having considered giving up his work in the electro-plate trade and becoming a full-time translator of foreign texts.

/22-23: P.L. Panum for the Organizing Committee of the Physiological Section of the International Medical Congress at Copenhagen in 1884, with draft letter from Norris to Panum. Relating to the International Medical Congress.

/24: J.H. Poynting [John Henry Poynting (1852-1914), physicist], of 385 Hagley Road, Edgbaston. Regarding Norris' address to be read at the Birmingham Philosophical Society.

/25-30: George St Clair, of 127 Bristol Road, Edgbaston and at 50 Gordon Square, London. Regarding St Clair's paper to be read at a meeting of the Birmingham Philosophical Society, suggesting a possible error in Norris' method of photographing blood corpuscles. See also US41/1/3/10 for St Clair's paper.

/31-32: Dr Robert Saundby, of 71 Newhall Street, Birmingham and Birmingham Medical Institute, Edmund

Papers of Richard Hill Norris

Street. Letter relating to Strauss's Report on Cholera and Koch's 5th Report; and letter relating to a proposed 'conversazione' for the Pathological Section, and asking Norris if he could show something at the meeting.

/33-34: Smith Elder and Co., of 15 Waterloo Place, London. Letter and accounts regarding the publication of Norris' book, 'The Physiology and Pathology of the Blood'.

/35: H.W. Watson [Henry William Watson (1827-1903), mathematician and Church of England clergyman], of The Rectory, Berkeswell, Coventry. Regarding the 'Phil. Society' [Birmingham Philosophical Society].

/36: C.J. Woodward, of Birmingham and Midland Institute. Relating to a meeting of the Physical Society of London to be held in Birmingham, and asking if Norris would like to entertain a member of the Society attending the meeting.

US41/7/27 1885 correspondence [1885]

Correspondence dated or appearing to date to 1885.

Letters from the following correspondents are included:

/1-4: The Autotype Company and J.R. Sawyer of the Autotype Company, of 74 New Oxford Street, London; and Ealing Dene, Middlesex. Letters, receipt and credit note relating to the printing of plates of photographs.

/5-6: L.L. Fyffe, of 113 (Hac...?) Road, Chicago, staying at the Stork Hotel. Letter thanking Norris for a book; and Mrs Fyffe's visiting card.

/7: Norris to Wharton Jones [Thomas Wharton Jones (1808-1891), physiologist and ophthalmic surgeon]. Relating to Norris' paper on blood and agreeing with Jones' criticism of the Royal Society.

/8: W. Richard Old, of Buckingham Villas, Hall Road, Handsworth. Thanking Norris for his book and relating to an annual meeting.

Papers of Richard Hill Norris

/9: Panum [Professor P.L. Panum], of Copenhagen, Bredgade 62. Requesting Norris' photograph of the Medical Congress at Copenhagen.

/10: James Russell. Letter in envelope marked by Norris 'Dr Russell, a few lines inscribed with a pencil a few days before his death'.

/11: Mary E. Russell, of 59 Calthorpe Road. Letter written following her husband's death.

/12: (Tapetus Sleemtrup?), of K. Frederiksberggade 18, Copenhagen, Denmark. Thanking Norris for his paper 'On the microscopic aspects of the coagulation of the blood'.

/13-15: Francis Troup, of 1 Minto Street, Edinburgh. Letters relating to Norris' work on blood, with a question by Troup asking where he could find a description of the process and apparatus needed for the photographs used in Norris' paper.

/16: Augustus Waller [Augustus Desire Waller (1856-1922), physiologist], of Lynden House, 29 Abbey Road. Regarding micro-photography.

13 letters, 1 receipt, 1 credit note, 1 visiting card

Custodial history: Formerly part of Norris 162.

US41/7/32 1890 correspondence 1890

Correspondence dated or appearing to date to 1890.

Letters from the following correspondents are included:

/1-24: John Gamgee [1831-1894, veterinary surgeon and inventor], of 6 Lingfield Road, Wimbledon and The Laboratory, 3 Church Street, Millbank Street, Westminster, London; and drafts or copies of letters from Norris to Gamgee. An extensive series of correspondence mainly relating to a book which was being written by Gamgee 'On the principle of work in man' for which Norris appears to have been contributed regarding blood. The letters also refer extensively to Gamgee's experiments on thermodynamics and his efforts in attempting to develop a new engine, and includes copies of letters regarding the engine from Gamgee to Lady Jane Taylor, from S.Z. de Ferranti Ltd to Gamgee, and from Gamgee to The Earl of Crawford and Balcarres. The letters also relate to Norris' earlier work on blood including a copy of a letter from John Cleland to Gamgee regarding Norris' work on blood, and including a draft letter from Norris giving an account of the reception

Papers of Richard Hill Norris

that his theories and work on blood received. Some of the letters also discuss Norris' new photographic plates.

/24: Adeline Gamgee [wife of John Gamgee], of 6 Lingfield Road, Wimbledon.

/25-26: The London Iron Building Co., facing Battersea Park Station and Gladstone Road, London. Letter relating to specification for an iron shed 50 feet long by 27 feet wide, and copy of specification.

/27: Draft letter from Norris to Southall Brothers and Barclay.

/28: Southall Brothers and Barclay, manufacturing analytical and pharmaceutical chemists of Birmingham. Regarding proposal to work Norris' patent.

/29-33: Harold W. Southall, of Almeley. Regarding proposal to work Norris' patent. Southall's business card is also included.

31 letters, 1 specification, 1 business card

Access: Open

Custodial history: Details of former reference numbers are included in the deposit file.

US41/7/33 1891 correspondence 1891

Letter from Gust. and Heinr. Beneke, of Lobau i Sachsen, paper manufacturers. Addressed to Mr W. Tylar. Offers samples of paper. 28 October.

US41/7/49 Undated correspondence [mid 19th century-early 20th century]

Correspondence with no year date. See also US41/6/3/40 for an undated letter from Norris to R. Hodgson relating to spiritualism.

Letters from the following correspondents are included:

/1: [Norris] to unidentified person. Part of draft or copy of letter, giving career advice to the recipient's brother, who was interesting in entering the medical profession.

/2: [Norris] to unidentified person. Part of draft or copy of letter relates to exhibiting at the conversazione (for the Royal Society?) and other matters.

/3: Norris to unidentified man. Draft or copy of part of letter, relating to rooms in a college.

/4: [Norris] to Professor (...?). Draft or copy of letter relating to Norris' paper on blood.

/5: [Norris] to unidentified man. Draft or copy of letter relating to a meeting him and his daughter at the Cork meeting of the British Medical Association, sending a copy of Norris' paper and regarding Dr Wade.

/6: [Norris] to unidentified man. Draft or copy of letter relating to Norris' work on blood. Written on the back of a printed notice for the 1863 Annual Meeting of the Young Men's Christian Association.

/7: [Norris] to unidentified man. Draft or copy of letter relating to the rejection of his application to the Royal Society, and regarding the medical profession.

Papers of Richard Hill Norris

- /8: Norris to unidentified man. Thanking the recipient for sending a copy of his book of 'Tablets'.
- /9: Norris to unidentified company. Relating to printing of photographs, for illustrating Norris' paper in the Birmingham Philosophical Society's journal.
- /10: [Norris] to unidentified man. Part of letter relating to Norris' experiments on iron and steel wire.
- /11: [Norris] to unidentified man. Draft or copy of letter relating to wire research. Found in envelope marked 'Iron Correspondence' and 'Letters to and from Mechanical Institute of Engineers and the Royal Soc re RN's experiments on expanses of Steel Wire'.
- /12: Norris to unidentified man. Draft or copy of letter relating to the use of dry collodion photographic plates for solar and stellar photography.
- /13: Norris to unidentified man. Draft or copy of letter relating to photographic plates.
- /14: [Norris] to unidentified man. Letter asking the recipient to second Norris' application to join the Psychical Society [Society for Psychical Research?] and relating to a medium called Read.
- /15: Norris to unidentified man. Draft or copy of letter relating to spiritualism.
- /16: Norris to unidentified man. Draft or copy of letter relating to spiritualism and requesting an interview.
- /17: (unsigned), of 51 Newhall Street, Birmingham. Relates to exhibiting of microphotographs, microscopical specimens etc at Dr Foster's Conversazione on 3 June.
- /18: Edmund (...?), (of Framlingham Church, Suffolk?). Relates to sending a pair of snakes to Norris and other matters.
- /19: (?) of 8 Great Ormond Street, London. Relating to a hallucinating woman and relating to spiritualism.
- /20: [Norris] to Dr Allchin. Regarding giving a demonstration illustrated by micro-photographs of the blood.
- /21: Arnott, Halliday and Co., photographic mount, cardboard and Christmas card manufacturers, of Marshall's Mills, Holbeck, Leeds. Regarding the opening

Papers of Richard Hill Norris

of London office for the supply of Mawson and Swan's Dry Plates. [early 20th century].

/22: T.H. Bartleet [Professor of Physiology at Queen's College, Birmingham], of Calthorpe Road. Relates to teaching physiology at Queens College.

/23: George William Baskett, makers of 'apparatus in sound, light, heat, electricity, chemistry, photography', of North Station Road, Colchester. Addressed to 'Gentlemen' (the Birmingham Dry Collodion Plate and Film Company?). Relates to collodion dry lantern plates.

/24: [Norris] to Miss Bates. Draft or copy of letter relating to spiritualism.

/25: Lionel S. Beale. Part of letter.

/26: [Norris] to Dr (Binz?). Relating to Bizzozero's reply in the Centralblatt to Norris' letter in the Lancet regarding blood.

/27: William Sands Cox [1802-1875, surgeon and a founder of Queen's College, Birmingham], of 27 Lansdowne Place. Regarding illness of Mrs Shailer.

/28: William Crookes [Sir William Crookes (1832-1919), chemist and science journalist], of 20 Mornington Road, London. Letter inviting Norris to visit him.

/29: Norris to Mr Crookes. Requesting Crookes to give a lecture for a society.

/30: Norris to Dr Edmonds. Draft or copy of letter relating to experiments with iron and steel.

/31: Norris to Dr Hall Edwards. Relating to photography.

/32: Elliott Brothers, of 101-102 St Martins Lane, London. Letter sent to Dr G. Gore of 67 Broad Street, Birmingham regarding coil of silver wire and electro-dynamometer.

/33: M.A. Elvis, 322 Birchfield Road, Perry Barr, [Birmingham]. Asks Dr Norris to see his or her father who is ill.

/34: J. Everitt, of 26 Penton Street, Pentonville, London to M. Spears.

/35-36: M. Foster [Sir Michael Foster (1836-1907), university teacher], of Huntingdon, and at New Club, 9

Papers of Richard Hill Norris

Spring Gardens, London. Letter relating to Norris' paper, and letter inviting him to dinner.

/37: P. Frank, of Minley, Farnborough Station. Relates to Norris' paper on mammalian blood.

/38: Norris to Henry [Fulford]. Relating to Norris' suggestion for Mr and Mrs Fulford to buy shares in Norris' company for producing photographic plates, with Norris offering to provide political help to Fulford.

/39: G.A. Glasgow, of 359 Strand, corner of Burleigh Street, [London]. Offering accommodation. Some notes by Norris are written on the back.

/40: (M?) Gull. Relating to spiritualism.

/41: Dr Gull, of 74 Brook Street, Grosvenor Square, London. Thanking Norris for a copy of his pamphlet on 'Extrusion of the Morphological Elements of the Blood'.

/42: Emma Hardinge [later Emma Hardinge Britten], of 6 Walsall Terrace, Kensington, London to Mr Harrison. Informs Harrison that she cannot help him at the present time.

/43: Hickinbotham, of Park Road, Nechells. Thanking Norris for a pamphlet.

/44: [Norris] to Mrs Hickman. Draft or copy of letter relating to religion and Norris' philosophies.

/45: Frances E. Hoggan [Frances Elizabeth Hoggan, physician and social reformer], of 7 Trevor Terrace, Rutland Gate, London. Advising Norris of a possible translator (Madame Schmahl) for Norris' paper or book.

/46: G.M. Humphry [George Murray Humphry]. Part of letter.

/47: Sallie Kenyon, of 12 Church Street, Kensington, London, addressed to her uncle (her uncle does not appear to be Norris, as 'Norris' is referred to in the letter). Relates to arguments with Mr Marlow (presumably at the Birmingham Dry Collodion Plate and Film Company or its successor) regarding a letter and Norris' testing of plates and personal matters.

/48-51: [Norris] to Mr Mansfield, of 102 West 15th Street, New York, United States of America. Letter (two versions) with list of questions (2 copies) relating to spiritualism.

Papers of Richard Hill Norris

/52: Norris to Sir Josiah Mason; and Professor Johnson, with appended proposal for the establishment of a Chair of Physiology and Original Investigation at Mason's College.

/53: Herbert L. Norris. A list of books.

/54: James W. Ogle, of 13 Upper Brook Street. Thanking Norris for a copy of his pamphlet on blood.

/55: Norris to Professor Poynting (draft or copy of letter). Requesting an introduction to Principal [Oliver] Lodge, and inviting Poynting to visit Norris in his bungalow.

/56: Copy of memorandum by Professor G.G. Stokes on Norris' paper.

/57-59: Norris to Professor Stokes. Two drafts or copies of letter regarding Norris' paper 'On certain molecular changes which occur in Iron & Steel during the separate acts of Heating & Cooling'; and letter relating to an application to the [Royal Society] Grant Fund and Norris' paper on iron and steel.

/60: Alfred R. Wallace [Alfred Russel Wallace (1823-1913), naturalist, evolutionary theorist and social critic], of 9 St Mark's Crescent, Regent's Park, London.

/61: [Norris] to Mr Wallace. Draft or copy of a lengthy letter relating to spiritualism. The letter criticizes Huxley and other scientists who ignored spiritualism, provides an account of seances with Mr and Mrs Guppy, and discusses other points relating to spiritualism.

/62: H. Woodruff, of 336 Kingsland Road, London to Dry Collodion Plate Company. Letter requesting six dozen Hill Norris Lantern Plates and commenting on previous plates sent.

/63: Frederick Worcester, of 18 1/2 Haymarket, Leicester. Asking (Norris?) to see a gentleman in Coventry with a diseased tongue. Some notes in Norris' hand are annotated to the letter.

61 letters, 2 lists of questions
